Synthesis And Characterization Of Acetaminophen:

The Molecular Modeling and Characterization of Acetaminophen Using Spartan 5.0 Computational Software

Kayla Jardine,2015 In the past few decades computational chemistry has emerged as a research tool in the pharmaceutical industry Computational chemistry can be used to model the structure of individual molecules and predict chemical properties which can be used in the process of drug design In addition to its predictive capabilities computational chemistry can also be used to validate experimental results This research focuses on the use of computational chemistry to characterize and model acetaminophen following an experimental synthesis Acetaminophen was synthesized in the laboratory and analyzed using Infrared Spectroscopy Then the products and reactants of the synthesis were modeled using the Spartan 5 0 software and calculated spectra were obtained for various EDF2 potentials The calculated spectra converged with the experimental gas phase IR spectra interfaced in the Spartan software The calculated spectra for acetaminophen were also consistent with IR absorption ranges found in the literature *Advanced Materials for Pharmaceutical Wastewater Treatment* P.V.

Nidheesh,Aydin Hassani,2024-09-04 Effluents generated from the pharmaceutical industry contain organic and inorganic contaminants that create potential threats to human health and the environment Pharmaceuticals cannot be effectively removed by conventional wastewater treatment plants owing to the complex composition high concentration of organic contaminants high salinity and biological toxicity of pharmaceutical wastewater This book provides an overview of the production and environmental impacts of pharmaceutical compounds and their advanced treatment methods with a focus on advanced materials used for removing pharmaceutical contaminants from wastewater Provides an overview of the current state of advanced research and applications of materials for pharmaceutical wastewater treatment Discusses various adsorbents photocatalysts and electrodes with a special focus on carbon materials Covers advanced material synthesis and fabrication Features case studies and chapters that are fully application oriented This book is essential reading for researchers and practitioners in materials science and engineering environmental science and engineering chemical engineering and water treatment who are seeking to develop and implement advanced technologies for waste minimization and mitigation **The Organic Chemistry of Drug Design and Drug Action** Richard B. Masters Theses in the Pure and Applied Sciences Wade H. Shafer, 1990-01-31 Masters Theses in the Pure and Applied Sciences was first conceived published and disseminated by the Center for Information and Numerical Data Analysis and Synthesis CINDAS at Purdue University in 1957 starting its coverage of theses with the academic year 1955 Beginning with Volume 13 the printing and dissemination phases of the activity were transferred to University Microfilms Xerox of Ann Arbor Michigan with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination Hence starting with Volume 18 Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York and in the same year the coverage was broadened to include Canadian universities All back issues can also be ordered from Plenum We have reported in Volume 32 thesis year 1987 a total of 12 483 theses titles from 22 Canadian and 176 United States universities We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work While Volume 32 reports theses submitted in 1987 on occasion certain universities do report theses submitted in previous years but not reported at the time
