Studying Language through Literature Emilia Di Martino, Bruna Di Sabato, 2014-11-10 Studying Language through Literature invites readers to reconsider the opportunity represented by literary texts for language related purposes Despite the close relationship between literature and language in educational contexts literature is frequently associated with teaching practices which have been judged to be unsuccessful Subsequently texts of the non literary type are preferred on the basis that they are authentic and closer to real language The everlasting relationship between language and literature is here reassessed starting from two assumptions literature is the expression of an emphasized perception of reality be it private collective or pertaining to a certain temporal spatial context and literary language is language in its utmost form Following an outline of the philosophy that governs the book each chapter presents specific insights on the use of the various different literary genres namely fiction poetry and drama The

opportunities offered by translation in the foreign language classroom constitute a recurrent theme throughout the book although Chapter 5 is entirely devoted to translation criticism The closing pages put forward a few reflections on assessment While offering some food for thought in order to reassess the role of literature in the language class this book puts together ideas considerations and suggestions from which the reader is free to pick mix and adjust exploiting them to her his greatest benefit **"Who Chose this Face for Me?"** Elisabetta Cecconi,2007 Drawing on theories from stylistics pragmatics and narratology this study explores the linguistic literary interface of Joyce s Ulysses focusing on the author s orchestration of different textual cues for presenting characters and secondary characters as miniature examples of human complexity

Encyclopedia of Language & Linguistics E. K. Brown,2006 *The Language and Literature Reader* Ronald Carter,Peter Stockwell,2008 The Language and Literature Reader is the first collection in over a decade to address the study of the linguistic foundations and components of literature **Brno Studies in English** ,2005 [The Routledge Pragmatics Encyclopedia](#) Louise Cummings,2013 This is a comprehensive reference volume that will give the reader an insight into all the concepts theories issues and scholars that have shaped the field of pragmatics *The Language Parallax* Paul Friedrich,2014-04-15 Humankind has always been fascinated and troubled by the way languages and dialects differ Linguistically based differences in point of view have preoccupied many original minds of the past such as Kant and remain at the forefront of language study in philosophy anthropology literary criticism and other fields Paul Friedrich s *The Language Parallax* argues persuasively that the locus and focus of differences among languages lies not so much in practical or rational aspects as in the complexity and richness of more poetic dimensions in the nuances of words or the style and voice of an author This poetic reformulation of what has been called linguistic relativism is grounded in the author s theory of the imagination as a main source of poetic indeterminacy The reformulation is also based on the intimate relation of the concentrated language of poetry to the potential or possibilities for poetry in ordinary conversation dreams and other experiences The author presents challenging thoughts on the order and system of language in their dynamic relation to indeterminacy and ultimately disorder and chaos Drawing on his considerable fieldwork in anthropology and linguistics

Friedrich interweaves distinct and provocative elements the poetry of language difference the indeterminacy in dialects and poetic forms the discovery of underlying orders the workings of different languages the strength of his own poetry The result is an innovative and organic whole The Language Parallax then is a highly original work with a single bold thesis It draws on research and writing that has involved in particular English Russian and the Tarascan language of Mexico as well as the personal and literary study of the respective cultures Anthropologist linguist and poet Friedrich synthesizes from his experience in order to interrelate language variation and structure the creative individual ideas of system in process and questions of scientific and aesthetic truth The result is a new view of language held to the light of its potentially creative nature

Linguistics and Language Behavior Abstracts, 1999 LLBA contains abstracts of the world's literature in linguistics and language related research book abstracts book review listings and enhanced bibliographic citations of relevant dissertations Related disciplines such as anthropology education ethnology information science medicine and communications are covered Also includes some reference to papers in published conference proceedings

Negation, Text Worlds, and Discourse Laura Hidalgo-Downing, 2000-05 This work originates from the need to develop an integrated dynamic model of negation in discourse that is adequate for understanding the role of negation in an extensive and complex piece of discourse Most work on negation is strongly influenced by traditional philosophical problems but little work has been carried out in the area of discourse Approaches to negation within the functional cognitive tradition tend to focus of specific agents of negation its function as a speech act or its cognitive model Few attempts have been made to propose an integrated discourse model studies of negation with few exceptions tend to be limited to brief selections or isolated sentences This book fills the gap in studies of negation in discourse by providing an up to date critical review of the state of the art in negation and by proposing a model that brings together the semantic cognitive and pragmatic features of negation which are crucial for an understanding of its role in discourse
