Photography and Making Bedouin Histories in the Naqab, 1906-2013 Emilie Le Febvre, 2023-12-22 Introducing a novel anthropological study of photography in the Middle East Emilie Le Febvre takes us to the Naqab Desert where Bedouin use photographs to make and respond to their own histories She argues Bedouin presentations of the past are selective but increasingly reliant on archival documents such as photographs which spokespersons treat as evidence of their local histories amid escalating tensions in Israel These practices shape Bedouin visual historicity that is the diverse ways people produce their pasts in the present with images This book charts these processes through the afterlives of six photographs c 1906 2013 as they circulate between the Naqab s entangled visual economies a transregional landscape organised by cultural ideals of proximity and assemblages of Bedouin iconography Le Febvre illustrates how representational contentions associated with tribal civic and Palestinian Israeli politics influence how images do history work in this society She concludes Bedouin visual historicity is defined by acts of persuasion during which photographs authenticate alternating history projects Here Bedouin value photographs not because they evidence singular narratives of the past Rather the knowledges inscribed by photography are multifarious as they support diverse constructions of history and society with which members mediate a wide range of relationships in southern Israel This book bridges studies of anthropology photography Palestinian Israeli politics and Bedouin Middle East history

World Heritage Management and Human Rights Stener Ekern, William Logan, Birgitte Sauge, Amund Sinding-Larsen, 2016-03-22 This book focuses on the balance between protecting human rights and protecting world heritage sites It concerns itself with the idea that the management of heritage properties worldwide may fail to adequately respect traditional entitlements and rights of individuals and communities living within or being affected by changes in the use of these spaces It also explores the concept that the international heritage field has limited knowledge and awareness of this challenge The volume argues that the dilemmas in question result from different conceptualisations of the key terms of rights heritage and community among different groups and across political and cultural boundaries In so far as culture is what enables us to read the meanings involved the ultimate questions are those that ask whose power is contested when one meaning is fixed and the heritage of one group of humans is given the right to have its symbolic representation enjoyed and protected The included case studies give vivid examples of this This book was originally published as a special issue of the International Journal of Heritage Studies

people boundary lines documents and maps in a search for the meaning of architecture of resistance Stemming from the need for an alternative discourse that can nourish the Palestinian spaces of imagination the author reinterprets the land from a new perspective by stripping it of the dominant power of lines to expose the hidden dynamic topography born out of everyday Palestine It applies a hybrid approach of research through design and visual documentary through text illustrations mapping techniques and collages to capture the absent local narrative as an essential component of spatial investigation
