Water as a Human Right for the Middle East and North Africa Asit K. Biswas, Eglal Rached, Cecilia Tortajada, 2008 This book systematically and comprehensively analyzes the legal development of the concept of water as a human right its implications for the national governments as well as the impact of the implementation of this concept for international and national organizations

OECD Principles on Water Governance Aziza Akhmouch, Delphine Clavreul, Sarah Hendry, Sharon Megdal, James Nickum, Francisco Nunes-Correia, Andrew Ross, 2020-04-30 The science policy interface is critical to the design and implementation of water policies In theory scientists provide policy makers with robust facts and data that can help guide decision making and lessons from the political economy of reforms can push scientific boundaries further to trigger further research for wise solutions While evidence based policy is obviously desirable in practice such a connection is not always straightforward Another assumption behind the science policy gap is the discrepancy between scientists and policy makers in terms of culture process timing language and expected outcome This book tries to reconcile this discrepancy through a multi stakeholder approach to authoring its different articles This joint initiative between the OECD particularly its Water Governance Initiative and the International Water Resources Association seeks to provide a canvas for grounding water policy in science and vice versa The objective of this book devoted to the OECD Principles on Water Governance is to use the OECD Principles as a common thread across the articles to draw lessons from theoretical work and practical experiences in water governance reforms but also to only feature papers authored by groups of diverse stakeholders from different institutional backgrounds This book was originally published as a special issue of *Water International*

Water V I Grover, 2016-04-19 Water is one of the most essential element for the survival of living beings With the increase in demand and decreasing quality and quantity water has become one of the major issues and problems in the world today It is unevenly distributed geographically and temporally resulting in surpluses for some people and a threat for others This book c
