impossibility of correctly accounting for the retrospective period of valuation Both of these shortcomings can currently be overcome only within the framework of the modern theory of Brusov Filatova Orekhova BFO which is done in this monograph devoted to the development of a qualitatively new approach to the valuation of businesses and companies The second most important method of business valuation CAPM was generalized by the authors to include financial risk along with business risk and for the first time this was done correctly A new model CAPM 2 0 was created and applied to many companies And finally CAPM 2 0 was included in the modern theory of Brusov Filatova Orekhova BFO which allows for a correct assessment of a business and a company taking into account both business and financial risks illustrating the practical application of the developed innovative approach
