international icon like the Sydney Opera house which has always been Australia's pride was delayed by 10 years with its budget shooting up by 14.5 times its estimated budget of 7 million. There are plenty of such examples available. It is very common for construction projects to get delayed and outrun their budget. This is a tough scenario faced by almost all projects around the world with India not being an exception. Thus the researcher has undertaken this research to investigate the factors responsible for delays and cost overruns. Both secondary research and primary research have been carried out and the barriers have been identified. Such barriers create problems that hinder the efficiency and progress of a project making it lag behind its schedule. The factors identified in the secondary research are compared to the findings of the primary research to see if they hold true in the Indian context.
