Lorentz Dispersion Model Horiba:

Ellipsometry at the Nanoscale Maria Losurdo, Kurt Hingerl, 2013-03-12 This book presents and introduces ellipsometry in nanoscience and nanotechnology making a bridge between the classical and nanoscale optical behaviour of materials It delineates the role of the non destructive and non invasive optical diagnostics of ellipsometry in improving science and technology of nanomaterials and related processes by illustrating its exploitation ranging from fundamental studies of the physics and chemistry of nanostructures to the ultimate goal of turnkey manufacturing control This book is written for a broad readership materials scientists researchers engineers as well as students and nanotechnology operators who want to deepen their knowledge about both basics and applications of ellipsometry to nanoscale phenomena It starts as a general introduction for people curious to enter the fields of ellipsometry and polarimetry applied to nanomaterials and progresses to articles by experts on specific fields that span from plasmonics optics to semiconductors and flexible electronics The core belief reflected in this book is that ellipsometry applied at the nanoscale offers new ways of addressing many current needs The book also explores forward looking potential applications

Progress in Adhesion and Adhesives, Volume 8 K. L. Mittal, 2024-10-01 Keep up to date with the latest on adhesion and adhesives from an expert group of worldwide authors The book series Progress in Adhesion and Adhesives was conceived as an annual publication and the premier volume made its debut in 2015 The series has been well received as it is unique and provides substantive and curated review chapters on subjects that touch many disciplines The current book contains nine chapters on topics that include multi component theories in surface thermodynamics and adhesion science plasma deposited polymer layers as adhesion promoters functional interlayers to control interfacial adhesion in reinforced polymer composites hydrophobic materials and coatings from natural sources mechanics of ice adhesion epoxy adhesives technology latest developments and trends hot melt adhesives for automobile assembly lifetime estimation of thermostat adhesives by physical and chemical aging processes and nondestructive evaluation and condition monitoring of adhesive joints Audience The volume will appeal to adhesionists adhesive technologists polymer scientists materials scientists and those involved interested in adhesive bonding plasma polymerization adhesion in polymer composites durability and testing of adhesive joints materials from natural sources and ice adhesion and mitigation
