Sharing Cities Duncan McLaren, Julian Agyeman, 2015-12-04 How cities can build on the sharing

economy and smart technology to deliver a sharing paradigm that supports justice solidarity and sustainability The future of humanity is urban and the nature of urban space enables and necessitates sharing of resources goods and services experiences Yet traditional forms of sharing have been undermined in modern cities by social fragmentation and commercialization of the public realm In *Sharing Cities* Duncan McLaren and Julian Agyeman argue that the intersection of cities highly networked physical space with new digital technologies and new mediated forms of sharing offers cities the opportunity to connect smart technology to justice solidarity and sustainability McLaren and Agyeman explore the opportunities and risks for sustainability solidarity and justice in the changing nature of sharing McLaren and Agyeman propose a new sharing paradigm which goes beyond the faddish sharing economy seen in such ventures as Uber and TaskRabbit to envision models of sharing that are not always commercial but also communal encouraging trust and collaboration Detailed case studies of San Francisco Seoul Copenhagen Medell n Amsterdam and Bengaluru formerly Bangalore contextualize the authors discussions of collaborative consumption and production the shared public realm both physical and virtual the design of sharing to enhance equity and justice and the prospects for scaling up the sharing paradigm through city governance They show how sharing could shift values and norms enable civic engagement and political activism and rebuild a shared urban commons Their case for sharing and solidarity offers a powerful alternative for urban futures to conventional race to the bottom narratives of competition enclosure and division
