Neufert Architects Data Fourth Edition:

Architects' Data Ernst Neufert, Peter Neufert, 2012-03-26 Neufert's Architects Data is an essential reference for the initial design and planning of a building project. It provides in one concise volume the core information needed to form the framework for the more detailed design and planning of any building project. Organised largely by building type, it covers the full range of preliminary considerations and with over 6200 diagrams, it provides a mass of data on spatial requirements. Most illustrations are dimensioned and each building type includes plans, sections, site layouts, and design details. An extensive bibliography and a detailed set of metric/imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 39 editions and many translations. This fourth English language edition is translated from the 39th German edition and represents a major new edition for an international English speaking readership. Reviews of the Previous Edition: Neufert's Architects Data was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs. Cesar Pelli. With this thorough rewrite, Neufert has produced yet again an invaluable reference book. The Architects Journal. **The Architect's Sourcebook** Stanislas Chaillou, 2024-06-17 The Architect's Sourcebook provides readers with an accessible and playful space planning manual for the digital age. The Sourcebook conveniently brings together general dimensions, layout tips, and the CAD data designers actually need to draw spaces in their software. A 1000 readily downloadable CAD blocks provided by the software company Rayon are offered throughout the Sourcebook to help architects address generic typologies: housing, office, and outdoor spaces. The quality and diversity of this digital repository will become the architect's best friend to create most kinds of space layout. At a time when Architecture's tool set and knowledge leaves increasingly online, this book represents both a much needed update to traditional architectural handbooks and a timely complement to well known design manuals. More than 1 000 CAD blocks to download for 2 D floor layout planning. Design for housing, office, and outdoor spaces, leisure, and sports. Introductory texts on the typologies and the use of the book. Download Guidelines <https://stanislaschaillou.com/kits/grexpplanation> FAQ <https://stanislaschaillou.com/kits/faq> **Planning and Designing the Absent City** Luca Trabattini, 2024-06-27 This book concerns the study of open air accommodation facilities. The market evolutions allow us to look at these structures as temporary settlements characterised by a low density dwelling and a close connection with natural elements and the landscape. This new and different point of view is sustained by the tendency of outdoor tourism to go in the direction of temporary villages and this tendency is directly related to time and landscape. The landscape is the reason why the campsite is settled. The time is linked to the holiday season timing. Today both are greatly influenced by the introduction of the Maxi Caravan. This removable living unit can be placed on the empty pitch, occupying the landscape without ruining the soil. By the settlement of Maxi Caravans, the campsite is transformed from an empty landscape with tents to a temporary settlement whose timing is divided between the seasonal timing of the campsite and the timing of the product.

and whose landscape is organised by the relation with the prevalent landscape and the internal one The book's core defines the outdoor facility structure using Italy as the main case study To identify design strategies the book analyses temporary settlement examples quick time and projects from historic outdoor tourism medium time Finally the last chapter reflects on open air accommodation facilities by showing their applicability in the different contexts of the refugee camps long time The aim of this research is to enhance the theme of open air accommodation facilities highlighting the need to equalise the study of temporary settlements with that of permanent settlements It will be of interest to researchers and students of planning landscape and tourism
