Signposts '85 Beryl Pratley, 1985. Of those 16 year olds who stay on in full time education almost half choose to do so in further adult education. Although the percentage of students enrolled in general education programs has fallen off slightly since 1980, this group still forms the largest single group of 16 to 19 year old students in the United Kingdom. Of all of the areas of adult education, vocational preparation is the one that has developed most dramatically since 1980. The Youth Training Scheme, which was developed in 1983, merged two previously distinct programs: Unified Vocational Preparation and the Youth Opportunities Program. Services for special needs students and for students between the ages of 14 and 18 have experienced a particularly dramatic increase. Another recently developed alternative form of part time study for unemployed youth is the Technical and Vocational Initiative (TVIA). A state action plan implemented in Scotland in 1984 has made development of TVIA in that country particularly rapid, with about 650 40 hour prevocational modules already in existence in August 1984. Appendixes to this review include participation statistics, examination entries of the major further education bodies in 1984, a list of objectives and cores of various programs of study, a glossary of abbreviations and references, and suggestions for further reading.
