Resources in Education ,1996 *Community Engagement and the COVID-19 Pandemic* Tawnya Azar,2025-06-24

Community engaged CE teaching is not a new concept However in the past several years it has gained increased emphasis as is evident by the changes to institution mission statements and the allocation of institution resources to support faculty development in CE teaching as well as to support CE coursework and research The arrival of the COVID 19 pandemic forced many faculty members to pivot to an all online instruction model impacting community engaged teaching and research in both predictable and unexpected ways Community partners facing similar struggles to serve their communities with restrictions on face to face interaction were often too overwhelmed to work with higher education volunteers Legally universities could not ask students to risk their health with face to face community engagement In fact the number of CE courses decreased dramatically in 2020 and 2021 due to the unique challenges posed by the pandemic At the same time the pandemic presented some CE faculty with new opportunities for community engagement Some responded swiftly to the immediate needs of the local regional or national community with which they worked taking advantage of the affordances of digital technology or capitalizing on the issues that the pandemic itself created or exacerbated This collection captures the incredible work of pivoting and innovating in community engaged teaching With a primary focus on community engaged teaching in higher education this collection explores how faculty students and community partners navigated their work during the COVID 19 pandemic Additionally it raises important questions about how we might stay engaged with community during a crisis The Education Index ,1982 **The Adoption of Artificial Intelligence and Inertia in Higher**

Education James Hutson,2025-10-01 This research monograph explores the complex resistance to integrating Artificial Intelligence AI within higher education institutions Despite the significant potential of AI to enhance education faculty adoption remains inconsistent and is often met with skepticism This book investigates key factors contributing to this resistance such as leadership deficits funding barriers cultural inertia and faculty attitudes toward technological change Drawing on qualitative and quantitative empirical data case studies from U S and international institutions and theoretical analysis the book uncovers underlying concerns about job security and professional identity It points to actionable strategies for overcoming these barriers and will be relevant for scholars researchers advanced students and educators grappling with issues navigating technological integration in academia and with interests in the sociology of education educational technology and higher education administration Catalog of Copyright Entries.
