Adapt Tim Harford, 2011-05-10 In this groundbreaking book Tim Harford the Undercover Economist shows us a new and inspiring approach to solving the most pressing problems in our lives When faced with complex situations we have all become accustomed to looking to our leaders to set out a plan of action and blaze a path to success Harford argues that today's challenges simply cannot be tackled with ready made solutions and expert opinion the world has become far too unpredictable and profoundly complex Instead we must adapt Deftly weaving together psychology evolutionary biology anthropology physics and economics along with the compelling story of hard won lessons learned in the field Harford makes a passionate case for the importance of adaptive trial and error in tackling issues such as climate change poverty and financial crises as well as in fostering innovation and creativity in our business and personal lives Taking us from corporate boardrooms to the deserts of Iraq *Adapt* clearly explains the necessary ingredients for turning failure into success It is a breakthrough handbook for surviving and prospering in our complex and ever shifting world

Intellectual Property Excesses Enrico Bonadio,Aislinn O'Connell,2022-06-30 This collection of essays highlights the sometimes absurd outcomes which an unjustified overprotection of intellectual property IP may lead to It collects and comments on a series of IP disputes which have taken the notion of IP protection to extremes From individuals being sued for hundreds of thousands of dollars for sharing a playlist to sports spectators being arrested for wearing the wrong dresses passing through granting patents for inventions obtained by misappropriating traditional knowledge and trademark protection of merely descriptive signs this book brings together a broad range of examples from across the IP spectrum where protection and enforcement have been used or threatened on unreasonable and or untenable grounds The aim of the book is to criticise these excesses precisely because they harm IP and because they contribute to creating an environment where more and more people are led to hate IP and view it as a protectionist regime which discourages creativity in innovation and ends up safeguarding the owners of monopolistic rights which restrict trade competition and people s freedom This is not therefore a book against IP it is instead a call for change and an attempt to save IP through critiquing its excesses and preventing such a fascinating area of law from continuing to be an easy target for criticism The book includes a foreword by Jason Mazzone Albert E Jenner Jr Professor of Law at the University of Illinois USA
