Beardsworth, Randall E. Auxier, 2017-05-09 The Philosophy of Umberto Eco stands out in the Library of Living Philosophers series as the volume on the most interdisciplinary scholar hitherto and probably the most widely translated The Italian philosopher's name and works are well known in the humanities both his philosophical and literary works being translated into fifteen or more languages Eco is a founder of modern semiotics and widely known for his work in the philosophy of language and aesthetics He is also a leading figure in the emergence of postmodern literature and is associated with cultural and mass communication studies His writings cover topics such as advertising television and children's literature as well as philosophical questions bearing on truth reality cognition language and literature The critical essays in this volume cover the full range of this output This book has wide appeal not only because of its interdisciplinary nature but also because of Eco's famous high and low approach which is deeply scholarly in conception and very accessible in outcome The short essay Why Philosophy included in the volume is exemplary in this regard it will appeal to scholars for its wit and to high school students for its intelligibility *Diario de sesiones* Uruguay. Asamblea General. Cámara de Representantes, 1921 *Boletín judicial* , 1968 *First Pages* Giancarlo Maiorino, 2010-11 Titology a term first coined in 1977 by literary critic Harry Levin is the field of literary studies that focuses on the significance of a title in establishing the thematic developments of the pages that follow While the term has been used in the literary community for thirty years this book presents for the first time a thoroughly developed theoretical discussion on the significance of the title as a foundation for scholarly criticism Though

Maiorino acknowledges that many titles are superficial and indexical there exists a separate and more complex class of titles that do much more than simply decorate a book's spine To prove this argument Maiorino analyzes a wide range of examples from the modern era through high modernism to postmodernism with writings spanning the globe from Spain and France to Germany and America By examining works such as *Essais* *The Waste Land* *Ulysses* and *Don Quixote* First Pages proves the power of the title to connect the reader to the thematic cultural and literary context of the writing as a whole Much like a facade to a building the title page serves as the frontispiece of literature a sign that offers perspective and demands interpretation
