for centuries there has been a discussion about how effective leadership of people or employees can be realized It has always been a major concern within market based economic systems to learn how its products and services should be designed in order to generate consumer demand That the discussion about business and employee management is more relevant than ever is linked to the fact that leadership situations are influenced by a variety of external factors They include in particular political cultural social demographic economic and technological developments It is therefore required for business and employee management to be adapted to those external framework conditions on a permanent basis In former times the assumption in mainstream leadership research was that leadership success relied on specific personal characteristics Later on the prevailing view was that the decisive factors in employee management lied in specific leadership behavior or leadership styles Today s research on leadership is dominated by situation oriented approaches providing for specific leadership concepts for specific organizational and employee related structures The present thesis is an attempt to bundle a variety of approaches to leadership with the aim of providing an overarching framework for concepts of a similar nature Therefore the leadership concept to be developed in what follows is to be characterized by the principles of holism and sustainability The first step is to present the fundamentals of leadership and management in order to introduce key terms and concepts and provide an overview of the research on leadership Chapter 3 deals with separately displaying the business and employee management approaches of various management pioneers distinguishing between early and contemporary pioneers Each approach is presented in consideration of its key elements its strengths and opportunities as well as its weaknesses and limitations The fourth chapter finally is devoted to developing a holistic and sustainable leadership concept

Promoted to Failure Marcus Thorne, 2026-02-24 Traditional management theory specifically the Peter Principle dictates that people are promoted until they reach a level where they are incompetent and there they stay However modern corporate structures have evolved a far more cynical and damaging mechanic known as the Dilbert Principle This business critique argues that companies purposefully take their least competent most unproductive employees and promote them directly into management Why To get them out of the workflow The organization realizes that these individuals are too dangerous to be allowed near the actual code the physical product or the actual customers so they are neutralized by being given a desk and a title By examining catastrophic structural failures in software firms and massive manufacturing giants the book outlines how this psychological defense mechanism destroys morale When the actual wealth creators the highly skilled engineers designers and salespeople realize they are being managed by the office idiot the entire culture collapses into apathy Stop rewarding incompetence to save face Learn to identify the structural loopholes that allow the Dilbert Principle to thrive and build an HR framework that actually promotes capability *Our Lives and Times* World Publications, Incorporated, 2003-09 Recorded history s most dynamic epoch comes to life as never before in book form A veritable browser s paradise *Our Lives Times* encompasses the 20th century and beyond packing more than one hundred years of facts images essays and
