Learning Theory Thomas J. Tighe, 1982 Gives the reader a good opportunity to evaluate the contributions of animal learning studies to the understanding of complex human behavior It could well serve as the text for a college course in the psychology of learning or be used as a reference by professional psychologists and educators Science Books Films Curriculum Theory, Practice and Active Learning in Changing Societies Toomas Tenno, 2002 *The Masque of Medieval and Modern Learning and Its Many Meanings*, 1913 *Contemporary Learning Theory and Research* Roger M. Tarpy, 1997 This is a thorough and scholarly discussion of basic learning primarily drawing from the research on the conditioning of animal subjects It is written for the sophomore junior course in learning with general psychology as the only prerequisite Tarpy's primary orientation is cognitive stressing the way in which knowledge is represented information is processed and stored and decisions are made The second important focus covers the ecological relevance of learning how basic learning mechanisms process information so that various species may behave more adaptively in their own environmental niche Publisher description *A Reconstruction in Teacher-training that Accords with Modern Educational Ideals* Alethea Hebron Washington, 1928 **The Fifth International Conference on Technology and Education**, 1988 **Handbook of Online Learning** Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute's focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there's a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e.g. lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors' primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re-examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re-thinking how knowledge is

acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments
