Significant im provements have been made in Wengert s method and are utilized in this text The purpose of this text is to familiarize computer users with a simple and practical method for obtaining the partial derivatives of complicated mathematical expressions The text illustrates the use of automatic deriva tive evaluation subroutines to solve a wide range of nonlinear least squares optimal control system identification two point boundary value problems and integral equations The numerical values of the derivatives are evalu ated exactly except for roundoff using simple FORTRAN or BASIC sub routines These derivatives are derived automatically behind the scenes from the equivalent of analytical expressions without any effort from the user The use of costly software packages is not required   **Assembly** West Point Association of Graduates (Organization),1990   **Mathematical Questions and Solutions, from the "Educational Times"** W.
