4 Axis Step Motor Controller Smc Etech

Michael A. Corey

4 Axis Step Motor Controller Smc Etech:

Four Axis Stepper Motor System Ho Young Lee,1993 **Closed-loop Step Motor Control Using Absolute Encoders**,1997 A multi axis step motor control system was developed to accurately position and control the operation of a triple axis spectrometer at the High Flux Isotope Reactor HFIR located at Oak Ridge National Laboratory Triple axis spectrometers are used in neutron scattering and diffraction experiments and require highly accurate positioning This motion control system can handle up to 16 axes of motion Four of these axes are outfitted with 17 bit absolute encoders These four axes are controlled with a software feedback loop that terminates the move based on real time position information from the absolute encoders Because the final position of the actuator is used to stop the motion of the step motors the moves can be made accurately in spite of the large amount of mechanical backlash from a chain drive between the motors and the spectrometer arms A modified trapezoidal profile custom C software and an industrial PC were used to achieve a positioning accuracy of 0.00275 degrees of rotation A form of active position maintenance ensures that the angles are maintained with zero error or drift

Step Motors and Control Systems Benjamin C. Kuo,1979 **The Art and Practice of Step Motor Control** Albert C. Leenhouts,1987 **Development of Stepper Motor Controller** Gareth Burns,1986 **Stepper Motor Controller** Michael A. Corey,1990 *Stepping Motor Control Processor Reference Manual* ,1980 This manual is intended to serve several purposes The first goal is to describe the capabilities and operation of the SMC processor package from an operator or user point of view Secondly the manual will describe in some detail the basic hardware elements and how they can be used effectively to implement a step motor control system Practical information on the use installation and checkout of the hardware set is presented in the following sections along with programming suggestions Available related system software is described in this manual for reference and as an aid in understanding the system architecture Section two presents an overview and operations manual of the SMC processor describing its composition and functional capabilities Section three contains hardware descriptions in some detail for the LLL designed hardware used in the SMC processor Basic theory of operation and important features are explained
