Boundaries of Discourse in the International Court of Justice Michelle L. Burgis,2009 How can Third World experiences of colonialism and statehood be expressed within the confines of the International Court of Justice How has the discourse of international law developed to reflect postcolonial realities of universal statehood In a close and critical reading of four territorial disputes spanning the Arab World Burgis explores the extent to which international law can be used to speak for and speak to non European experiences of authority over territory The book draws on recent critical international legal scholarship to question the ability of contemporary international adjudication to address Third World grievances from the past A comparative analysis of the cases suggests that international law remains a discourse only capable of capturing a limited range of non European experiences during and after colonialism

Continuous Issues in Numerical Cognition Avishai Henik,2016-05-18 *Continuous Issues in Numerical Cognition: How Many or How Much?* re-examines the widely

accepted view that there exists a core numerical system within human beings and an innate ability to perceive and count discrete quantities This core knowledge involves the brain's intraparietal sulcus and a deficiency in this region has traditionally been thought to be the basis for arithmetic disability However new research findings suggest this wide agreement needs to be examined carefully and that perception of sizes and other non countable amounts may be the true precursors of numerical ability This cutting edge book examines the possibility that perception and evaluation of non countable dimensions may be involved in the development of numerical cognition Discussions of the above and related issues are important for the achievement of a comprehensive understanding of numerical cognition its brain basis development breakdown in brain injured individuals and failures to master mathematical skills Serves as an innovative reference on the emerging field of numerical cognition and the branches that converge on this diverse topic Features chapters from leading researchers in the field Includes an overview of the multiple disciplines that comprise numerical cognition and discusses the measures that can be used in analysis Introduces novel ideas that connect non countable continuous variables to numerical cognition

Middle East Transitions Shahid Yusuf, 2014-07-25 Since the onset of the Arab Spring economic uncertainty in Egypt Jordan Libya Morocco Tunisia and Yemen Arab Countries in Transition ACTs has slowed already sluggish growth worsened unemployment particularly of youth undermined business confidence affected tourist arrivals and depressed domestic and foreign direct investment Furthermore political and social tensions have constrained reform efforts Assessing policy options as presented in the voluminous literature on the Arab Spring and based on cross country experience this paper concludes that sustainable and inclusive growth calls for a two pronged approach short term measures that revive

growth momentum and partially allay popular concerns complemented with efforts to adjust the public's expectations and prepare the ground for structural reforms that will deliver the desired longer term performance

Targeted Killings, Law and Counter-Terrorism Effectiveness Ophir Falk, 2020-06-01 This book examines the permissibility and effectiveness of targeted killing in campaigns against terror Targeted killing has become a primary counterterrorism measure used by several countries in their confrontation with lethal threats The practice has been extensively used by the US in Afghanistan Iraq Pakistan Yemen and Somalia and by Israel in the West Bank and Gaza Several studies have already explored the difficult balance between achieving security while maintaining the liberties and rights of a country's civilians This book goes a step further by seeking to examine whether maintaining those liberties by complying with legal standards and minimizing unintended deaths can be more effective for national security Using targeted killing applied by Israel in particular as well as the United States during the first decade of the twenty first century as case studies this book explores that question and ultimately assesses whether compliance with legal standards can strengthen a state in its campaign against terrorism and thus provide stronger security The book focuses on civilian related criteria hypothesizing that minimizing civilian casualties will maximize effectiveness in an asymmetric war setting The conclusions are not limited to a specific tactic or theater and if adopted might have far reaching implications for how asymmetric warfare is strategized This book will be of much interest to students of counter terrorism law Middle Eastern studies and security studies
