### COST CONTROL

The basic objective of accounting is to provide information which is useful for persons inside the organisation (*i.e.* owners, management and employees) and for persons or groups outside the organisation (*i.e.* investors, creditors, government, consumers etc.) According to *Slavin and Reynolds Professors of Accounting*, "Conceptually, accounting is the discipline that provides information on which external and internal users of the information may base decisions that result in the allocation of economic resources in society." The needs of the majority of the users of accounting information can be satisfied by financial accounting. Financial statements are concerned with the past whereas management's main interest lies not in past but in future. It is mainly concerned with planning and controlling. Preparation of various budgets, such as sales budget, production budget, cash budget, capital expenditure budget etc. is an important part of planning and preparing various budgets is an important aspect of Cost and Management Accountancy. Controlling is the function of seeing that programmes laid down in various budgets are being actually achieved *i.e.* actual performance is compared with the budgeted performance, enabling the management to exercise control in case of weak performance.

Now-a-days managements are facing problems of survival because of acute competition. Only those organisations can meet the competition effectively and have a hold on the market
