Abernathy, 1979      Paperbound Books in Print, 1992      **The Publishers Weekly**, 2002      **Race in American Television** David J. Leonard, Stephanie Troutman Robbins, 2021-01-26

This two volume encyclopedia explores representations of people of color in American television. It includes overview essays on early classic and contemporary television and the challenges for developments related to and participation of minorities on and behind the screen. Covering five decades, this encyclopedia highlights how race has shaped television and how television has shaped society. Offering critical analysis of moments and themes throughout television history, *Race in American Television* shines a spotlight on key artists of color, prominent shows, and the debates that have defined television since the civil rights movement. This book also examines the ways in which television has been a site for both reproduction of stereotypes and resistance to them, providing a basis for discussion about racial issues in the United States. This set provides a significant resource for students and fans of television alike, not only educating but also empowering readers with the necessary tools to consume and watch the small screen and explore its impact on the evolution of racial and ethnic stereotypes in U.S. culture and beyond. Understanding the history of American television contributes to deeper knowledge and potentially helps us to better apprehend the plethora of diverse shows and programs on Netflix, Hulu, YouTube, and other platforms today.

The American Design Adventure, 1940-1975 Arthur J. Pulos, 1988

*The American Design Adventure* continues the fascinating and detailed examination of industrial design begun by Arthur Pulos in *American Design Ethic*. The first volume discussed and illustrated the objects and artifacts, the major designers, and schools of design from Colonial times to the 1940s. This second, splendidly illustrated volume carries the story into the heroic era of American industrial design from the 1940s to the 1970s. These were the decades of American industrial design's dominance when special exhibitions and world fairs made design a subject of national pride. Big business realized the influence that trademarks, packaging, and corporate identity programs could have on their bottom line, and the world of fashion created a consumer demand for name brands and well-designed products. Industrial design flourished under the capable hands of Raymond Loewy and Charles Eames, while corporations like IBM, RCA, Herman Miller, and Knoll were sponsors of the great American design adventure. The extraordinary collection of illustrations that Pulos has assembled documents all of these important design trends while evoking the nostalgia of the 50s and 60s when Pop and Rock held sway. Pulos probes all aspects of industrial designers and their work in education and private corporations, in professional organizations, and governmental agencies. He also covers prefabricated housing, graphics, manufactured products from the exotic to the
