*FOUNDATION ENGINEERING* P. C. VARGHESE, 2005-01-01 Foundation Engineering is of prime importance to undergraduate and postgraduate students of civil engineering as well as to practising engineers For there is no construction be it buildings government commercial and residential bridges highways or dams that does not draw from the principles and application of this subject Unlike many textbooks on Geotechnical Engineering that deal with both Soil Mechanics and Foundation Engineering this text gives an exclusive treatment and an indepth analysis of Foundation Engineering What distinguishes the text is that it not merely equips the students with the necessary knowledge for the course and examination but provides a solid foundation for further practice in their profession later In addition as the book is based on the Codes prescribed by the Bureau of Indian Standards students of Indian universities will find it particularly useful The author is specialized in both Soil Mechanics and Structural Engineering he studied Soil Mechanics under the guidance of Prof Terzaghi and Prof Casagrande of Harvard University the pioneers of the subject Similarly he studied Structural Engineering under Prof A L L Baker of Imperial College London the pioneer of Limit State Design These specializations coupled with over 50 years of teaching experience of the author make this text authoritative and exhaustive Intended as a text for undergraduate Civil Engineering and postgraduate Geotechnical Engineering and Structural Engineering students the book would also be found highly useful to practising engineers and young academics teaching the course Design of Reinforced Concrete Foundations P. C. Varghese, 2009-12 It explains step by step procedure for the design of each type of foundation with the help of a large number of worked out examples The book provides an in depth analysis of topics such as wall footings balanced footings raft foundations beam and slab rafts pile caps and pile foundations *PRESTRESSED CONCRETE* MUTHU, K. U., IBRAHIM, AZMI, YADAV, MAGANTI JANARDHAN, VIJAYANAND, M., 2016-01-18 The book begins with a brief introduction helping the reader to understand the fundamentals of stress concept and prestressed concrete systems The discussion then follows to explain the computation of different losses and estimation of ultimate flexural and shear strength Important codal provisions viz IS1343 2012 Eurocode EN2 and BSEN 1 2004 are also highlighted in this text For clear understanding of the materials the text is supported by a good number of figures and tables Besides covering the important topics on design and analysis of anchorage zone stresses and analysis of continuous beam the book also discusses composite construction and circular prestressing The book is designed as a textbook for the senior level undergraduate and postgraduate students of civil engineering and construction technology **KEY FEATURES** Contains several solved numerical problems for better understanding of the various aspects of design principles Provides summary at the end of each chapter highlighting the important points Gives a number of Review Questions and MCQs along with unsolved Numerical Problems wherever required BUILDING MATERIALS, SECOND EDITION VARGHESE, P. C., 2015-02-26 This practice oriented book now in its second edition presents a lucid yet comprehensive coverage of the engineering properties and uses of the

materials commonly used in building construction in India Profusely illustrated with tables and diagrams the book brings into light the basics of building materials and their specifications Besides giving information regarding the traditional building materials the text now acquaints the reader with up to date and in depth information pertaining to modern materials available in the market The references to IS codes and standards make this text suitable for further study and field use The second edition possesses some substantial changes in Chapters 12 13 14 and 20 Now the book offers a new section on durability of concrete in Chapter 12 a modified section regarding revision of IS 10262 1982 code on concrete mix design to IS 10262 2009 and a new section on classification of exposure conditions in Chapter 13 and a new section relating to large advances made in concrete construction and repair chemicals in Chapter 14 Besides the content of Chapter 20 has been completely updated with a particular emphasis on the extensive use of aluminium in building construction Primarily intended for the students pursuing undergraduate degree B E B Tech and diploma courses in civil engineering and architecture the book on account of lecture based presentation of the subject should also prove eminently utilitarian for the young teachers to use it in their classroom lectures as well as for practising engineers to get a clear understanding of the fundamentals of the subject NEW TO THE SECOND EDITION Review questions at the end of each chapter enable the reader to recapitulate the topics Considerable attention is given on field practice Syllabus of laboratory work on construction materials and a model question paper Anna University are given in appendices to guide the reader

### **GROUND IMPROVEMENT TECHNIQUES**

JOYANTA MAITY,BIKASH CHANDRA CHATTOPADHYAY,2017-05-01 Due to the unavailability of good construction sites owing to the growth of cities and industries the site engineers are nowadays compelled to adopt methods of forcing the weak soil to behave according to the project requirement Written in the same context the book focuses on the fundamental principles and practical methods of ground improvement The design and constructional procedure of different ground improvement methods are comprehensively covered in the text The subject matter divided into fourteen chapters is organised into a simplified and logical manner to describe first the working methods and then the possible future developments The book enables its readers to become aware of the overall methodology to be adopted in a particular case and seek possible solution to the chosen field It is primarily intended to cater the needs of undergraduate and postgraduate students of civil engineering and geotechnical engineering KEY FEATURES Numerous figures tables and mathematical equations are provided to support the topics discussed Several worked out examples are provided in most of the chapters Objective questions descriptive questions and references are given at the end of each chapter Numerical questions are given for practice in the relevant chapters An appendix introduces miscellaneous topics related to soil Sustainable Design and Eco Technologies for Infrastructure Rajinder Ghai,Luh-Maan Chang,Raju Sharma,Anush K. Chandrappa,2024-10-03 This book presents the select proceedings of Civil Engineering Conference in the Asian Region CECAR 9 hosted by the ICE I under the aegis of ACECC at Goa India from 21 23 September 2022 It presents innovations and recent trends in civil
