**The International Commission on Mathematical Instruction, 1908-2008: People, Events, and Challenges in Mathematics Education** Fulvia Furinghetti,Livia Giacardi,2023-01-30 The book presents the history of ICMI through a prosopographical approach In other words it pays a lot of attention to the actors of the International movement The portraits of the members of the ICMI Central Committees 1908 1936 and ICMI Executive Committees 1952 2008 and other eminent figures in ICMI history who have passed away in the first 100 years of its life are the guiding thread of the volume Each portrait includes Biographical information An outline of the various contributions made by the individual in question to the study of problems pertaining to mathematics teaching education Primary bibliography Secondary with particular attention to the publications concerning the teaching of mathematics Images photos book frontispieces relevant manuscripts The authors of the portraits 30 altogether are researchers in the history of mathematics mathematics and mathematics education The focus on the officer's role within ICMI and on his/her contributions to mathematics education make the portraits different from usual biographies In particular since most officers were active mathematicians the portraits shed light on aspects of their lesser known activity Connecting chapters place the action of these figures in the historical context and in the different phases of ICMI history

*Peano* H. Kennedy,2012-12-06 All students of mathematics know of Peano's postulates for the natural numbers and his famous space filling curve yet their knowledge often stops there Part of the reason is that there has not until now been a full scale study of his life and works This must surely be surprising when one realizes the length of his academic career over 50 years and the extent of his publications over 200 in a wide variety of fields many of which had immediate and long term effects on the development of modern mathematics A study of his life seems long overdue It appeared to me that the most likely person to write a biography of Peano would be his devoted disciple Ugo Cassina with whom I studied at the University of Milan in 1957 58 I wrote to Professor Cassina on 29 October 1963 inquiring if he planned to write the biography and I offered him my assistance since I hoped to return to Italy for a year He replied on 28 November 1963 suggesting that we collaborate meaning by this that I would write the biography in English using his material and advice I gladly agreed to this suggestion but work on the project had hardly begun when Professor Cassina died unexpectedly on 5 October 1964 I then decided to continue the project on my own I spent the academic year 1966 67 in Turin completion of the book took ten years

 This is the first comprehensive International Handbook on the History of Mathematics Education covering a wide spectrum of  
 epochs and civilizations countries and cultures Until now much of the research into the rich and varied history of  
 mathematics education has remained inaccessible to the vast majority of scholars not least because it has been written in the  
 language and for readers of an individual country And yet a historical overview however brief has become an indispensable  
 element of nearly every dissertation and scholarly article This handbook provides for the first time a comprehensive and  
 systematic aid for researchers around the world in finding the information they need about historical developments in  
 mathematics education not only in their own countries but globally as well Although written primarily for mathematics  
 educators this handbook will also be of interest to researchers of the history of education in general as well as specialists in  
 cultural and even social history      **Researching the History of Mathematics Education** Fulvia Furinghetti,Alexander

 of research and the methodology of the field History of mathematics education is treated in the book as a part of social  
 history This book grew out of the presentations delivered at the International Congress on Mathematics Education in  
 Hamburg Modern development and growing internationalization of mathematics education made it clear that many urgent  
 questions benefit from a historical approach The chapters present viewpoints from the following countries Belgium Brazil
