Planning of Eco-efficient Process Chains for Automotive Component Manufacturing Christopher Schmidt,2021-01-04 This book includes the introduction of emerging manufacturing technologies and planning cases with established technologies The planning of eco efficient process chains is crucial for manufacturing companies However in the state of the art planning various barriers exist towards the integration of the environmental dimension Against this background a concept for the integration of classic lean and environmental criteria into the three planning phases of process chains is presented During concept planning the Technology Assessment Tool supports planners in the identification of eco efficient technologies During rough planning the Value Stream Design Tool enables the derivation of a production line based on workpiece characteristics For detailed planning tools for eco efficient machine and process chain configuration are provided Three case studies from large scale automotive component manufacturing with established and emerging technologies demonstrate the tool applicability

Port Planning and Management Simulation Wenyuan Wang,Yun Peng,2021-10-27 Port Planning and Management Simulation examines port planning simulation applications showing how they supports better port decision making Using a clear organizational format based on actual port system structure and operation processes the book provides practical and theoretical insights on port planning and management The book describes the water land collecting and distributing components of the port system focusing on management development and risk mitigation It examines the key challenges based on discrete system simulation theory that is less affected by local or national regulations It compares various simulation scenarios for optimal port operational strategy It quantifies port emissions analyzes the impact of different reduction strategies and presents operational strategies for green port planning developmentmand management Port Planning and Management Simulation provides guidance for carrying out deep analysis in a complex and dynamic system providing an integrated solution framework based on simulation techniques for improving efficiency and cost savings of the port system Bridges the gaps between theory practice and policy Comprehensive practical and multidisciplinary content Case Studies

Software Engineering Methods in Intelligent Algorithms Radek Silhavy,2019-05-07 This book presents software engineering methods in the context of the intelligent systems It discusses real world problems and exploratory research describing novel approaches and applications of software engineering software design and algorithms The book constitutes the refereed proceedings of the Software Engineering Methods in Intelligent Algorithms Section of the 8th Computer Science On line Conference 2019 CSOC 2019 held on line in April 2019

Proceedings of the ... Winter Simulation Conference, 2002 *Simulation Modeling and Analysis, Sixth Edition* Averill M. Law, 2025-02-21 Comprehensive state of the art coverage of every important simulation technique This fully revised book has the most comprehensive and up to date coverage of all aspects of a simulation study Equally well suited for use in university courses simulation practice and self study the book offers clear and intuitive explanations as well as 300 figures 218 examples and 217 problems You will get detailed discussions on modeling and simulation simulation software model verification and validation input modeling random number and variate generation statistical design and analysis of simulation experiments experimental design simulation optimization agent based simulation machine learning and much more Authored by an operations research analyst and industrial engineer with more than 40 years of experience Simulation Modeling and Analysis is widely regarded as the bible of simulation and now has more than 178 000 copies in print and 23 700 citations This sixth edition has been streamlined with several chapters downsized to eliminate outdated simulation programs or statistical techniques that are rarely used in practice and are unnecessarily complicated Most analyses of simulation output data can now be done using three simple and familiar statistical formulas or expressions A new chapter covers AI and machine learning and their application to simulation Covers what are arguably the three most innovative and popular simulation software packages AnyLogic FlexSim and Simio Includes a set of instructor's resources Has been used at universities such as University of California Berkeley Stanford Georgia Tech Michigan Cornell Purdue Virginia Tech Penn State Wisconsin Columbia Texas A M Washington and Johns Hopkins Written by a world class expert in

the field and an experienced educator who has presented more than 550 simulation and statistics short courses in 20 countries

Simulation Modeling and Analysis Averill M. Law, W. David Kelton, 2000 This is a book on the theory and practice of simulation and includes new material on object oriented simulation techniques and communication networks

The Second International Symposium on Applications of Modelling as an Innovative Technology in the Agri-Food-Chain M. L. A. T. M. Hertog, Bruce R. MacKay, 2001 Simulation Stewart Robinson, 2004 Simulation modelling involves the development of models that imitate real world operations and statistical analysis of their performance with a view to improving efficiency and effectiveness This non technical textbook is focused towards the needs of business engineering and computer science students and concentrates on discrete event simulations as it is used in operations management Stewart Robinson of Warwick Business School offers guidance through the key stages in a simulation project in terms of both the technical requirements and the project management issues surrounding it Readers will emerge able to develop appropriate valid conceptual models perform simulation experiments analyse the results and draw insightful conclusions

Manufacturing Systems: Modelling, Management and Control 1997 Peter Kopacek, 1997-07-02 The IFAC TC on Manufacturing Modelling Management and Control MIM was founded on the IFAC World Congress Sydney 1993 The goals of this workshop concerned the development comparison and classification of formal models in the field of Computer Integrated Manufacturing Systems in a descriptive as well as prescriptive way Computer Integrated Manufacturing Systems are able to integrate optimization methods simulation models procedures and knowledge based tools The target for the workshop activities were related to the specification of requirements for new models which are used in simulating and designing manufacturing management and control strategies including discrete event and continuous representations Technical areas of interest at the system level included tools for plant layout design process planning production planning and control Technical areas of interest at the component level included models for functional description of flexible manufacturing and assembly systems oriented to production activity control process supervision and maintenance
