Planning and Implementing your Final Year Project – with Success! Mikael Berndtsson, Jörgen Hansson, B. Olsson, Björn Lundell, 2013-03-09 Don't wait for someone to write a book you want to read write it yourself! This was the message we received when we asked around for a book that described final year projects for computer science and information systems In this book we have gathered our experiences of conducting and supervising final year projects in computer science and information systems In this book we present a process for conducting final year projects This process was developed at the University of Skovde Sweden It has been applied successfully to a wide spectrum of projects with many different subject areas and styles of project Typical subject areas have included for example artificial intelligence theoretical computer science databases data communication distributed systems human computer interaction operating systems real time systems software engineering systems analysis and technology transfer The styles of projects have been both theoretical and more empirically oriented and have included both science and technology oriented projects It is our hope that this book will be a valuable companion to the three actors involved in a final year project student supervisor and examiner In addition to the general descriptions and advice provided in this book we want to emphasise that it is important for students to find out the exact requirements at the department where the project is undertaken May 2002 Mikael Berndtsson Jorgen Hansson Bjorn Olsson Bjorn Lundell Acknowledgements This book would not have been possible without the support of a number of people

Projects in the Computing Curriculum Michael Holcombe, Andrew F. Stratton, Sally A. Fincher, Gary Griffiths, 2012-12-06 Dr Peter Milton Director of Programme Review Quality Assurance Agency I am grateful to the authors for giving me the opportunity to write this foreword mainly because it represents the first occasion that the Fund for the Development of Teaching and Learning FDTL has led directly to a publication such as this In my former capacity as Director of Quality Assessment at the Higher Education Funding Council for England HEFCE I chaired the FDTL Committee during 1996-7 and am delighted to see the projects which were selected so painstakingly leading to successful outcomes Assessment of the quality of higher education HE was introduced in 1993 and was intended to improve public information about what was on offer in British universities and colleges as well as to assist in the enhancement of educational opportunities for students This was part of a larger agenda in which educational quality and the standards achieved by students have come under increasing scrutiny with a long term objective of linking funding allocations to the quality of the provision It was in this context that the FDTL Initiative was launched in 1995 to support projects aimed at stimulating developments in teaching and learning and to encourage the dissemination of good practice across the HE sector Good practice is identified through the process of quality assessment and bids for funding can only be made by those institutions which have demonstrated high quality provision To date the programme includes 63 projects drawn from 23 subject areas
