Financial Reporting under IFRS Wolfgang Dick, Franck Missonier-Piera, 2011-02-25 The International Financial Reporting Standards

are quite different from other sets of accounting standards and are fundamentally different from US GAAP in that they are based on principles and not on detailed rules. Financial Reporting under IFRS: A topic based approach offers a global perspective on IFRS by presenting the prescribed rationale and principles and illustrating them through numerous examples from large international companies. It aims to develop the fundamental skills necessary to read and use the information contained in all types of financial statements through examples, activities, questions and answers. The book is broadly divided into three sections. Section one examines the structure of the Balance Sheet and the Income Statement, their links and the accounting mechanisms used to prepare them. Section two deals with the identification, evaluation and reporting of Balance Sheet items. Section three covers the use of financial statements to analyze a firm's performance and its risks. Throughout the book, special topics are covered, including Derivatives and Hedge accounting, IAS 39 Business Combination, IFRS 3 and Operating Segments, IFRS 8. Financial Reporting under IFRS is ideally suited to the needs of students of accounting and financial reporting, but all users of financial statements, from creditors and investors to suppliers, customers, employees and governments, will benefit from its concise, topic based approach.

Financial Accounting Jamie Pratt, 1990 Financial Accounting Alan Robert Jennings, 1993 **Financial Reporting for Islamic Financial Institutions** Abdul Rauf Mahar, Ayesha Bhatti, Muhammad Junaid Ashraf, Asfand Zubair Malik, 2024-01-19

Mainstream accounting rules, namely International Financial Reporting Standards (IFRS), used in conventional banking, employ financial logics and principles which are at odds with Shariah and therefore unsuitable for reporting the results of Islamic banks. The book is an effort to explain the Islamic accounting principles and practices for Islamic Financial institutions and to juxtapose them to mainstream accounting principles in a simple and practical manner. The book begins with an overview of the Islamic Finance environment, the rationale for Islamic accounting and a brief introduction of AAOIFI (Accounting and Auditing Organization for Islamic Financial Institutions), the professional body responsible for the issuance of Islamic accounting standards. The main features of the AAOIFI Conceptual Framework and its comparison with IFRS framework are covered in Chapter 2. Chapters 3-9 cover the accounting treatment of the major Islamic finance products, including trade based Murabaha Salam and Istisna, a rental based Ijarah and risk sharing based products Mudarabah and Musharakah. Given the significance and complexity of Islamic bonds Sukuk for the Islamic finance industry, Chapter 10 discusses the basic accounting and reporting issues vis vis Sukuk, leaving more complex issues for advanced texts on the topic. Zakah, accounting, charity and provisions and impairments are covered in Chapters 11 and 12. The chapters are arranged so that they start with a discussion of the product itself, followed by the AAOIFI accounting treatment and ending with the IFRS perspective. Each chapter begins with the learning objectives and a cover story and closes with a summary of the learning objectives. To facilitate the learning of readers, each chapter contains a glossary of the terms introduced, as well as end of chapter multiple choice questions. In addition, each chapter includes practical insights and concept checks to enhance and test the understanding of the readers. This will be a useful guide for

students academics and practitioners concerned with the subject of financial reporting in Islamic Institutions
