The Lifecycle Of Software Objects Ted Chiang:

   The Lifecycle of Software Objects Ted Chiang,2010 What s the best way to create artificial intelligence In 1950 Alan Turing wrote Many people think that a very abstract activity like the playing of chess would be best It can also be maintained that it is best to provide the machine with the best sense organs that money can buy and then teach it to understand and speak English This process could follow the normal teaching of a child Things would be pointed out and named etc Again I do not know what the right answer is but I think both approaches should be tried The first approach has been tried many times in both science fiction and reality In this new novella at over 30 000 words his longest work to date Ted Chiang offers a detailed imagining of how the second approach might work within the contemporary landscape of startup companies massively multiplayer online gaming and open source software It s a story of two people and the artificial intelligences they helped create following them for more than a decade as they deal with the upgrades and obsolescence that are inevitable in the world of software At the same time it s an examination of the difference between processing power and intelligence and of what it means to have a real relationship with an artificial entity   **Practices of Speculation** Jeanne Cortiel,Christine Hanke,Jan Simon Hutta,Colin Milburn,2020-12-07 This volume offers innovative ways to think about speculation at a time when anticipation of catastrophe in an apocalyptic mode is the order of the day and shapes public discourse on a global scale It maps an interdisciplinary field of investigation the chapters interrogate hegemonic ways of shaping the present through investments in the future while also looking at speculative practices that reveal transformative potential The twelve contributions explore concrete instances of envisioning the open unknown and affirmative speculative potentials in history literature comics computer games mold research ecosystem science and artistic practice   Machine Decision Is Not Final Benjamin H. Bratton,Anna Greenspan,Amy Ireland,Bogna Konior,2026-03-31 An interdisciplinary cross cultural collection that decenters familiar narratives to provide a fresh perspective on what artificial intelligence is today and what it might become Historians media theorists science fiction writers philosophers and artists from China and elsewhere reexamine the nation s intense engagement with AI moving beyond the clich s that still dominate contemporary debate Today visions of the contested future of AI veer between common planetary goals and a new Cold War as culturally specific models of intelligence speculative traditions and thought experiments come up against the emergence of novel forms of cognition that cannot be reduced to any historical cultural tradition This uniquely positioned volume provides expert insight into this tension using China as a touchstone for rethinking artificiality and intelligence as sites of difference in a way that is already present in the difficulty of precisely translating the Chinese term Tracking the history of Chinese AI from the pre Cultural Revolution to the post Deng Xiaoping eras right up to contemporary debates surrounding facial recognition the writers in this collection draw on a mixture of speculative thought experiments and cutting edge use cases to offer singular views on topics including AI and Chinese philosophy AI ethics and policymaking the development of computational models in early Chinese cybernetics and

the aesthetics of Sinofuturism Spanning borders between different worlds histories futures and foundational models Machine Decision is Not Final is not only a timely reappraisal of the stakes of AI development but a tool for constructing more global imaginaries for the future of AI Contributors Blaise Aguera y Arcas Bo An Benjamin Bratton Shuang Frost Vince Garton Steve Goodman Yvette Granata Anna Greenspan Amy Ireland Xia Jia Bogna Konior Vincent Le Lawrence Lek Lukas Likavcan Suzanne Livingston Iris Long Bingchun Meng Reza Negarestani Chen Quifan Gabriele de Seta Hongzhe Wang Wang Xin Mi You   **The Multiverse of Office Fiction** Masaomi Kobayashi,2022-11-15 The Multiverse of Office Fiction liberates Herman Melville s 1853 classic Bartleby the Scrivener from a microcosm of Melville studies namely the so called Bartleby Industry This book aims to illuminate office fiction fiction featuring office workers such as clerks civil servants and company employees as an underexplored genre of fiction by addressing relevant issues such as evolution of office work integration of work and life exploitation of women office workers and representation of the Post Office In achieving this goal Bartleby plays an essential role not as one of the most eccentric characters in literary fiction but rather as one of the most generic characters in office fiction Overall this book demonstrates that Bartleby is a generative figure by incorporating a wide diversity of his cousins as Bartlebys It offers fresh contexts in which to place these characters so that it can ultimately contribute to an ever evolving poetics of the office   How to Research Like a Dog Aaron Schuster,2024-12-10 A provocative book that proposes a new and surprising inspiration for philosophy today the canine thinker from Kafka s story Investigations of a Dog Written toward the end of Kafka s life Investigations of a Dog Forschungen eines Hundes 1922 is one of the lesser known and most enigmatic works in the author s oeuvre Kafka s tale of philosophical adventure is that of a lone maladjusted dog who challenges the dogmatism of established science and pioneers an original research program in pursuit of the mysteries of his self and his world In How to Research Like a Dog Aaron Schuster uses the canine as a guide dog to rediscover Kafka s fictional universe while taking up the cause of this ingenious possessed melancholy comical and revolutionary thinker Neither an exercise in literary criticism nor a traditional philosophical commentary this charming and idiosyncratic book aligns itself with the research program of Kafka s dog It constructs an impossible system based on the fourfold division of nourishment music incantation and freedom or stated a bit differently enjoyment art institutions and freedom From Plato to Flaubert Lispector and Lacan Schuster puts the dog in dialogue with psychoanalytic theory the history of philosophy and modern literature Imagining the Unknown University that Kafka s new science calls for the book enlists new comrades in the dog s struggle   *Discognition* Steven Shaviro,2016-03-29 What is consciousness What is it like to feel pain or to see the color red Do robots and computers really think For that matter do plants and amoebas think If we ever meet intelligent aliens will we be able to understand what they say to us Philosophers and scientists are still unable to answer questions like these Perhaps science fiction can help In Discognition Steven Shaviro looks at science fiction novels and stories that explore the extreme possibilities of human and alien sentience   **Science Fiction as Legal Imaginary**

Alex Green,Mitchell Travis,Kieran Tranter,2024-11-21 This book examines how science fiction informs the legal imagination of technological futures Science fiction the contributors to this book argue is a storehouse of images tropes concepts and memes that inform the legal imagination of the future and in doing so generate impetus for change Specifically the contributors examine how science fictions imagine human life in space in the digital and as formed and negotiated by corporations They then connect this imaginary to how law should be understood in the present and changed for the future Across the chapters there is an urgent sense of the need for law as it is has been and as it might become to order and safeguard the future for a multiplicity of vulnerable entities This book will appeal to scholars and students with interests in law and technology legal theory cultural legal studies and law and the humanities **The Moral Status and Maturing of Ted Chiang's Digients in "The Lifecycle of Software Objects" (2010).
