**ACSM's Resource Manual for Guidelines for Exercise Testing and Prescription** David P. Swain, ACSM, Clinton A. Brawner, 2012-12-26 ACSM's Resource Manual for Guidelines for Exercise Testing and Prescription was created as a complement to ACSM's Guidelines for Exercise Testing and Prescription and elaborates on all major aspects of preventative rehabilitation and fitness programs and the major position stands of the ACSM. The 7th edition provides information necessary to address the knowledge, skills, and abilities set forth in the new edition of Guidelines and explains the science behind the exercise testing and prescription. ACSM's Resource Manual is a comprehensive resource for those working in the fitness and clinical exercise fields as well as those in academic training. [Textbook of Patient Safety and Clinical Risk Management](#) Liam Donaldson, Walter Ricciardi, Susan Sheridan, Riccardo Tartaglia, 2020-12-14 Implementing safety practices in healthcare saves lives and improves the quality of care; it is therefore vital to apply good clinical practices such as the WHO surgical checklist to adopt the most appropriate measures for the prevention of assistance-related risks and to identify the potential ones using tools such as reporting learning systems. The culture of safety in the care environment and of human factors influencing it should be developed from the beginning of medical studies and in the first years of professional practice in order to have the maximum impact on clinicians and nurses' behavior. Medical errors tend to vary with the level of proficiency and experience, and this must be taken into account in adverse events prevention. Human factors assume a decisive importance in resilient organizations, and an understanding of risk control and containment is fundamental for all medical and surgical specialties. This open access book offers recommendations and examples of how to improve patient safety by changing practices, introducing organizational and technological innovations, and creating effective patient-centered, timely, efficient, and equitable care systems in order to spread the quality and patient safety culture among the new generation of healthcare professionals and is intended for residents and young professionals in different clinical specialties.
