Use the following for questions #2 – 4

The psychology department at a local college is studying the effects of sleep deprivation on student test performance of the 1099 students at the college. Every 7<sup>th</sup> student enrolled at the college according to an ordered list of student ID numbers was chosen for the study. There were a total of 157 students participating in the study. All the students took an exam at 8am after a good night's sleep to get a baseline score for each student. The students then stayed up all night before an 8 a.m. exam (a variation of the same exam) one week later. Their grades on the exam were recorded and compared to the score they received after good night's sleep to see if there was any effect. The effect was recorded as the change in the number of points (+ or -) on the second exam. With 73% of the students, the score was at least 10 points lower.

2. The number 73% represents what type of information?  
A) Population      B) sample      C) parameter      D) statistic
3. What method of data collection was used in the study?
