Department of Information Technology, 2010 *Systems Biology, Bioinformatics and Livestock Science* Anupam Nath Jha, Sandeep Swargam, Indu Kumari, 2023-11-08 This book explores the intricate world of livestock sciences and production through the lens of systems biology Offering a comprehensive exploration of both fundamental and advanced aspects it unearths the potential of systems biology in the realm of livestock The book presents 13 edited chapters on cutting edge knowledge about systems biology and omics technology showcasing genomics transcriptomics proteomics metabolomics and more It illuminates the role of systems biology in livestock and disease management Readers will learn about power of technologies that merge computational biology nanobiotechnology artificial intelligence and single cell sequencing Each chapter is written by scientific experts and includes references for further reading The book covers 4 key themes Introduction to Systems Biology in Livestock Science Uncover the foundation of integrating systems biology with omics data for animal scientists Multi scale Modeling Techniques Explore how multi scale modeling is shaping the future of system biology Livestock Viral Diseases Gain insights into how systems biology is revolutionizing our understanding of livestock viral diseases Single Cell RNA Sequencing Understand the potential of this advanced technique in studying livestock animals at a cellular level This book is a timely resource for students and researchers offering a pathway to comprehend the crucial role systems biology plays in sustainable livestock production and management **SOCRATES** Dr. Hoff Maarten, Alsaeed Abraheem, Dr. Carl Adams, Saurabh Chandra, Peter Asare-Nuamah, Darko Emmanuel Agyepong, Ojo Patrick, Dr. Nandita Kaushal, Dr. Inderjeet Singh Sodhi, Shreyasi Ghosh, Stuti Saxena, Dr. Wahengbam Jyotirmoy Singh, 2016-12-02 Editorial We are living in an era of digitization thus moving towards a digital government The use of ICT in public administration is beneficial and it is not mere a coincidence that the top 10 countries in e government implementation according to UN E Government Survey 2016 are flourishing democracies There has been a sharp rise in the number of countries using e government to provide public services online through one stop platform According to the 2016 survey 90 countries now offer one or more single entry portal on public information or online services or both and 148 countries provide at least one form of online transaction services More and more countries are making efforts through e government to ensure and increase inclusiveness effectiveness accountability and transparency in their public institutions Across the globe data for public information and security is being opened up The 2016 survey shows that 128 countries now provide data sets on government spending in machine readable formats E government and innovation seems to have provided significant opportunities to transform public administration into an instrument of sustainable development The governments around the globe are rapidly transforming The use of information and communication technology in public administration combined with organizational change and new skills seems to be improving public services and democratic processes and strengthening support to public policies There has been an increased effort to utilize advanced electronic and mobile services that benefits

all Fixed and wireless broadband subscriptions have increased unevenly across regions with Europe leading but Africa still lagging behind We have to focus on these substantial region disparities and growing divide All countries agreed in SDG 9 that a major effort is required to ensure universal access to internet in the least developed countries The rise of Social media and its easy access seems to have enabled an increasing number of countries moving towards participatory decision making in which developed European countries are among the top 50 performers But the issues of diminishing collective thinking and rising Individual thinking are some rising issues that we will have to deal with in the future There are more sensitive issues like the new classification of citizens into literate illiterate e literate and e illiterate that the governments need to look upon It is a good sign that many developing countries are making good progress Enhanced e participation can support the realization of the SDGs by enabling more participatory decision making but the success of e government will ultimately depend upon our ability and capability to solve the contrasting issues raised due to this transition with sensitivity In this issue of SOCRATES we have discussed this new era of Digital Government We have focused on what we have learned from the past and the future we want From discussions on the role of e governance within the local government settings in a modern democratic state to the experience of an academia with online examination we have tried to include every possible aspect of e government Paper authored by Dr Hoff Maarten aims to outline the role of e governance within the setting of a local government in a modern democratic state It is agreed that a local governmental organization needs to be fit for the purpose of serving its citizens Fits can be tested both through universally acknowledged principles and drivers that suit modern on demand organizations Paper authored by Mr Alsaed Abraheem and Dr Carl proposes a conceptual framework which captures the main factors both enablers and barriers influence and contributes toward a successful implementation of eServices in countries that have unstable status The paper draws upon Osborn and Gaebler s work reinventing government which identifies 10 principles of government transformation This is used to examine eGov examples in the case of Syria along with previous work covering barriers and enablers to eGov activities within countries that have unstable status The resulting derived conceptual framework provides a base to understand eGov activity for nations going through geopolitical uncertainty Paper authored by Mr Saurabh Chandra highlights the initiatives taken by the Governments in India at various levels to modernise their processes and functions for delivery of information and services to the citizens using the Information and Communication technology ICT It also highlights E Government uptake in different parts of the world highlighting its need in India as in developing countries like India there is no comprehensive data on actual e government uptake on a global scale Paper authored by Mr Peter Asare Nuamah and Mr Darko Emmanuel Agyepong highlights the various legal policies and framework that support e governance in Ghana as well as the challenges of implementing e governance initiatives The findings of the study indicate that several polices and frameworks support e governance in Ghana but their implementations are burdened with social cultural political and legal constraints The study provides some recommendations that are

necessary to tackle the challenges of e governance implementation Paper authored by Mr Ojo Patrick highlights battling sub Saharan African countries The perspective in this paper is that the emergence of democratic governments in this region occurred through lopsided process which impacts on their governance structures Consequently the institutionalization of liberal democracy has been omitted the absence of which creates gaps between aspiration for and struggle by African people for democracy on the one hand and the actual performance of democratic governments on the other hand The paper identifies structural deficiencies in the current pattern of governance as the political missing link in the value chain between democracy and development in the region The paper recommends e governance an administrative process that guarantees good governance through accountability and transparency as the necessary connecting link and panacea to bridging the observable existing gaps Paper authored by Dr Nandita Kaushal highlights the Plausibility of E Governance as a Public Service Delivery Mechanism in India It argues that there is no doubt wherever e governance projects have been conceived designed and implemented with due regard to the needs of the people there positive outcomes have been visible However it has to be acknowledged that most of the projects are facing multiple challenges which are reducing their success rate It recommends serious consideration to all the issues which are hampering their efficiency At the same time it suggests measures that must be taken up to maintain the human face of these initiatives Paper authored by Dr Inderjeet Singh Sodhi reviews the achievements and progress of e government in India The paper briefly discusses various e government projects in India The purpose of the paper is to delve into policy and issue of the government of India in making e government accessible to the common person It briefly identifies the strategic issues for achievement of e government This paper derives a list of key strategic factors that are appropriate for planning designing development and implementation of e government The paper identifies the range of diverse problems challenges and barriers planners and developers must face as they work in the e government projects The paper discusses prospects and future of e government in India The paper highlights the role of government to develop richer and deeper understanding of e government Paper authored by Ms Shreyasi Ghosh attempts to trace the essence of e government in the modern era of Indian Public Administration today as another new paradigm shift is in the offspring and slowly becoming distinct from the amorphous shape of Public Administration in the Indian context with the ICT blessed governance or e Governance Paper authored by Ms Stuti Saxena probes the OGD platform using a qualitative and quantitative lens This paper shows that OGD usage is popular among the end users in terms of the number of views and downloads of the datasets Future research might undertake the empirical investigation of the research hypotheses advanced in the paper Paper authored by Dr Jyotirmoy W Singh is developed by a contributor who has been a national and International online examiner for past six or more years This paper is based on his experience It seeks to compare the traditional mode of examination with that of the online examination in citing the mode of High School Leaving Examination of Board of Secondary Education Manipur and International Baccalaureate Organisation IBO examination as case studies I wish

Association, Information Resources,2014-04-30 Following the migration of workflows data and communication to the Cloud and other Internet based frameworks interaction over the Web has become ever more commonplace As with any social situation there are rules and consequences to actions within a virtual environment Cyber Behavior Concepts Methodologies Tools and Applications explores the role of cyberspace in modern communication and interaction including considerations of ethics crime security and education With chapters on a variety of topics and concerns inherent to a contemporary networked society this multi volume work will be of particular interest to students and academicians as well as software developers computer scientists and specialists in the field of Information Technologies **Pattern Recognition in Bioinformatics**

Madhu Chetty, Alioune Ngom, Shandar Ahmad, 2008-09-29 In the post genomic era a holistic understanding of biological systems and processes in all their complexity is critical in comprehending nature's choreography of life. As a result, bioinformatics involving its two main disciplines, namely the life sciences and the computational sciences, is fast becoming a very promising multidisciplinary research field. With the ever-increasing application of large-scale high-throughput technologies such as gene or protein microarrays and mass spectrometry methods, the enormous body of information is growing rapidly. Bioinformaticians are posed with a large number of difficult problems to solve arising not only due to the complexities in acquiring the molecular information but also due to the size and nature of the generated data sets and/or the limitations of the algorithms required for analyzing these data. Although the field of bioinformatics is still in its embryonic stage, the recent advancements in computational and information theoretic techniques are enabling us to conduct various in silico testing and screening of many lab-based experiments before these are actually performed in vitro or in vivo. These in silico investigations are providing new insights for interpretation and establishing a new direction for a deeper understanding. Among the various advanced computational methods currently being applied to such studies, the pattern recognition techniques are mostly found to be at the core of the whole discovery process for apprehending the underlying biological knowledge. Thus, we can safely surmise that the going bioinformatics revolution may in future inevitably play a major role in many aspects of medical practice and/or the discipline of life sciences.

India Today, 1995 *Urban Growth and the Circular Economy*. Syngellakis, J. Melgarejo, 2018-08-29 Presented at the 1st International Conference on Urban Growth and the Circular Economy that was held in Alicante, Spain. The papers included in this book focus on the continuing and rapid growth of cities and their regions of influence and how that has led to the need to find new solutions which allow for promoting their sustainable development. The quest for the Sustainable City has until recently focused on the efficient use of resources with the application of technical advances giving rise to the definition of SMART Cities. The economic model emphasised, however, is still linear in the sense that the design and consumption follows the pattern of extraction of natural resources, manufacturing, product usage, and waste disposal. The continuous growth of urban population has recently given rise to the emergence of a new model which responds better to the challenges of natural resource depletion as well as waste management. This model has been called the circular economy. The circular economy is a recent concept based on the reuse of what up to now has been considered wastes, reintroducing them into the productive cycle. The objective of the circular economy is to reduce consumption and achieve savings in terms of raw materials, water, and energy, thus contributing to the preservation of resources in order to reach sustainable development. One of the most important of these resources is water, which is becoming a scarce commodity in an ever-expanding world whose population demands a better standard of living. Water is required for agricultural purposes as well as by industry, in addition to its use by the general population. The recycling of water is an essential component of the circular economy. There is no possibility for the success of a long-term

economic policy without addressing the problems of natural resources and environmental pollution which will affect the reuse of materials and products The current market economy based on a linear model from resource extraction manufacturing consumption and waste disposal has not proved a long term suitable solution in spite of the substantial efforts made in reducing its environmental impacts This is largely due to the continuous population growth in a society that demands high standards of living thus requiring an ever increasing share of natural resources
