Cambridge annually updated **Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles**
Robert Cassidy,Elizabeth S. Charles,James D. Slotta,Nathaniel Lasry,2019-07-11 This book represents the emerging efforts of
a growing international network of researchers and practitioners to promote the development and uptake of evidence based
pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that
attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to
change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co
design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of
publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners
in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community
These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more
productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically
examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions
Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and
practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent
both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a
third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of
abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing
these types of studies together in an open access format that we may contribute to the development of new forms of
practitioner researcher interactions that promote co design in pedagogical innovation **Catalogue - Harvard University**
