## Bleaching of Vegetable Oil using Organic Acid Activated Fuller's Earth (Bentonite Clay)

By Atif Khan

*University of Engineering and Technology, Pakistan*

**Abstract** - Vegetable oil is one of the basic food items which is consumed by almost every human being in this universe. Therefore quality of vegetable oil should be good enough so that it accounts for healthy life. In vegetable oil manufacturing there are four major steps involved which are neutralization, degumming, bleaching and deodorization. Among these steps bleaching is the very important and critical step because it ensures the good color and odor of vegetable oil. The famous method of bleaching in Pakistan is adsorption by inorganic acid activated fuller's earth (bentonite clay). Treatment with inorganic acid (Sulfuric acid and hydrochloric acid) activated bentonite clay is very efficient and shows satisfactory results. But there is a major disadvantage associated with its use. Fumes of hydrochloric acid or sulfuric acid are very dangerous for both the equipment and labor involved in manufacturing of vegetable oil. Therefore the safety of the labor and equipment is compromised. The major purpose of this research work is to give the alternative method for activation procedure of bentonite clay and this method should be the safest method for both the labor and equipment used in vegetable oil industry.

## **Bleaching Of Vegetable Oil Using Organic Acid Activated:**

*Bleaching of Vegetable Oil Using Organic Acid Activated Fuller's Earth* Khan Atif, Javed Hassan, 2015-08-26 Specific properties of bentonite clay have made them a valuable material in different process industries. Easy availability, low price and their effectiveness are the major factors which made fuller's earth an adsorbent in cooking oil manufacturing industry. Textural characteristics of fuller's earth play an important role in its performance. These characteristics can be modified by treatment with organic acids which is the safest method for enhancing the properties of fuller's earth. Major motivation of this research is to increase the adsorption capacity of fuller's earth by modification in its properties by organic acid treatment. Organic acid treatment assures the safety of equipment and safety of the labor as well. Four organic acids are used which are recommended best for activation. These acids are acetic acid, phosphoric acid, citric acid, and oxalic acid. Clay is treated with all of these four acids and the acid which generates more active sites in clay is the best recommended acid for activation.

**Edible Oil Processing from a Patent Perspective** Albert J. Dijkstra, 2012-09-28 Patent literature has always been a mine of information but until recently it was difficult to access. Now with the Internet access to all patent documents is almost instantaneous and free. However, interpreting the technical information provided by patent literature requires a certain skill. This monograph aims to provide that skill by explaining patent jargon and providing background information on patenting. Patents dealing with edible oil processing are used to explain various aspects of patenting. To make the explanations less impersonal, some have been larded with personal remarks and experiences. Accordingly, this monograph is intended for scientists and engineers dealing with edible oils and fats who want to extend their sources of technical information. Hopefully, it will inspire them to innovate, help them to avoid duplication, and provide them with some amusement.

*Use of Domestic Minerals for Vegetable Oil Bleaching* Yasemin Erten, İzmir Yüksek Teknoloji Enstitüsü, 2004 In this thesis acid activation and characterization studies were conducted for different clay samples and bleaching capacity of the selected acid activated clay samples for sunflower oil were determined. The samples selected for this study were naturally occurring clays from Ankara and Eskişehir regions. The acid activated zeolite was also used for the purpose to compare its bleaching performance with commercial bleaching clay Tonsil and the acid activated clays. The clay minerals were activated with hydrochloric acid (HCl) at three acid concentrations 1 N, 3 N, 5 N, activation times 1h, 2h, 3h, and different dry clay/acid ratios. The clay samples from the Ankara and Eskişehir regions were defined as montmorillonite according to X-ray diffraction (XRD). XRD results proved that acid activation caused structural changes in the treated montmorillonites; montmorillonite peaks gradually disappeared and yielded to an amorphous montmorillonite structure. The TGA results showed a significant weight loss between 30 °C–200 °C: 15% for the Ankara clay and between 20 °C–200 °C: 12% for the Eskişehir clay. This was most probably due to the removal of free and hydrogen bonded water molecules. Maximum surface area was obtained for the acid activated Ankara clay treated with 1 N HCl for 3 hours. It was determined to be 849.1 m<sup>2</sup>/g. Also, maximum surface area was 269.7 m<sup>2</sup>/g.

for the acid activated Eskişehir clay treated with 5 N HCl for 1 hour. Then the surface area of the acid activated clays decreased sharply with the acid activation. The chemical compositions of the solutions and clays after acid activation were determined using ICP and EDX analysis respectively. According to the results, the dissolution amount of CaO, Na<sub>2</sub>O, MgO, K<sub>2</sub>O, Fe<sub>2</sub>O<sub>3</sub> and Al<sub>2</sub>O<sub>3</sub> increased along with increasing acid concentration and treatment time. The SiO<sub>2</sub> content and the SiO<sub>2</sub>/Al<sub>2</sub>O<sub>3</sub> ratio increased as a result of dissolving of aluminium ions. This ratio increased from 6.0 to 7.5 for the acid activated Eskişehir clay and from 2.7 to 3.9 for acid activated Ankara clay. Acid activated clays were tested for the assessment of their bleaching efficiency for sunflower oil in the laboratory. Bleaching tests were carried out with earths prepared at different acid activation conditions such as acid concentration and activation times. The absorbance value was measured at 455 nm and found to be 0.429 for the neutralized sunflower oil. Peroxide value and free fatty acid content of the neutralized oil were found to be 16.8 meq/kg and 0.07 % respectively. The oil bleached with the acid activated Ankara clay had a peroxide value of 46.2 meq/kg first which decreased to 22.4 meq/kg and the free fatty acid content was observed to be around 0.08 %. For acid activated Eskişehir clay peroxide value of the bleached oil initially increased up to 31.2 meq/kg then decreased under the peroxide value of neutralized oil 16.8 meq/kg and free fatty acid content of bleached oil approximately was around 0.09 %. The bleaching parameters which were used for testing were 1 % earth concentration and 30 minutes contact time at 100 °C bleaching temperature. At these selected parameters acid activated Eskişehir clay (5 N 1h HCl treatment), Ankara clay (1 N 3h HCl treatment) and zeolite (2 N 6h HNO<sub>3</sub> treatment) were compared with the commercial bleaching clay Tonsil. The smallest value of absorbance and bleaching efficiency were found to be 0.084 and 80 % respectively with the Eskişehir clay and these values were determined to be 0.083 and 81 % with the Tonsil under the same conditions. The absorbance value and bleaching efficiency of the bleached oil with acid activated Ankara clay were determined to be 0.114 and 73 % respectively using the selected bleaching parameters. Bleaching performance of Ankara clay was found to be lower when compared with the result of Eskişehir clay. At the selected bleaching point, results of Lovibond red and yellow color of bleached oil indicated that the Eskişehir clay and Tonsil were close to each other in bleaching efficiency. Red color 0.8 and 1.1, yellow color 20 and 20 for Tonsil and Eskişehir clay respectively. Zeolite did not reach the required bleaching performance. The bleaching efficiency was 25 % with raw zeolite and it hardly increased to 46 % with the acid activated zeolite. In addition, red and yellow color values were higher than the other clays: red color 2.6, yellow color 30. As a result, Eskişehir clay gave a better bleaching performance compared to Ankara clay and Zeolite. Maximum bleaching efficiency was achieved after 30 minutes of contact time with 1 % earth concentration at 100 °C bleaching temperature following 5 N 1h HCl treatment for Eskişehir clay.

## **Bleaching Of Vegetable Oil Using Organic Acid Activated Introduction**

Bleaching Of Vegetable Oil Using Organic Acid Activated Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Bleaching Of Vegetable Oil Using Organic Acid Activated Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Bleaching Of Vegetable Oil Using Organic Acid Activated : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Bleaching Of Vegetable Oil Using Organic Acid Activated : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Bleaching Of Vegetable Oil Using Organic Acid Activated Offers a diverse range of free eBooks across various genres. Bleaching Of Vegetable Oil Using Organic Acid Activated Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Bleaching Of Vegetable Oil Using Organic Acid Activated Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Bleaching Of Vegetable Oil Using Organic Acid Activated, especially related to Bleaching Of Vegetable Oil Using Organic Acid Activated, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Bleaching Of Vegetable Oil Using Organic Acid Activated, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Bleaching Of Vegetable Oil Using Organic Acid Activated books or magazines might include. Look for these in online stores or libraries. Remember that while Bleaching Of Vegetable Oil Using Organic Acid Activated, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Bleaching Of Vegetable Oil Using Organic Acid Activated eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Bleaching Of Vegetable Oil Using Organic Acid Activated full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Bleaching Of Vegetable Oil Using Organic Acid

---

Activated eBooks, including some popular titles.

## **FAQs About Bleaching Of Vegetable Oil Using Organic Acid Activated Books**

1. Where can I buy Bleaching Of Vegetable Oil Using Organic Acid Activated books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Bleaching Of Vegetable Oil Using Organic Acid Activated book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Bleaching Of Vegetable Oil Using Organic Acid Activated books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Bleaching Of Vegetable Oil Using Organic Acid Activated audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.

10. Can I read Bleaching Of Vegetable Oil Using Organic Acid Activated books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
