Rethinking Reduction Francesco Cangemi, Meghan Clayards, Oliver Niebuhr, Barbara Schuppler, Margaret Zellers, 2018-06-25 Phonetically reduced forms are plentiful theoretically interesting and a key challenge for automatic speech recognition systems Yet canonical forms are still central to models of production and perception Drawing from different fields and diverse languages this volume brings new insights to the debate on abstractions and canonical forms in linguistics their psychological reality descriptive adequacy and technical implementability The languages of Malta Albert Gatt, 2018 The purpose of this volume is to present a snapshot of the state of the art of research on the languages of the Maltese islands which include spoken Maltese Maltese English and Maltese Sign Language Malta is a tiny but densely populated country with over 422 000 inhabitants spread over only 316 square kilometers It is a bilingual country with Maltese and English enjoying the status of official languages Maltese is a descendant of Arabic but due to the history of the island it has borrowed extensively from Sicilian Italian and English Furthermore local dialects still coexist alongside the official standard language The status of English as a second language dates back to British colonial rule and just as in other former British colonies a characteristic Maltese variety of English has developed To these languages must be added Maltese Sign Language which is the language of the Maltese Deaf community This was recently recognised as Malta s third official language by an act of Parliament in 2016 While a volume such as the present one can hardly do justice to all aspects of a diverse and complex linguistic situation even in a small community like that of Malta our aim in editing this book was to shed light on the main strands of research being undertaken in the Maltese linguistic context Six of the contributions in this book focus on Maltese and explore a broad range of topics including historical changes in the Maltese sound system syllabification strategies the interaction of prosody and gesture the constraints regulating t insertion the productivity of derivational suffixes and raising phenomena The study of Maltese English especially with the purpose of establishing the defining characteristics of this variety of English is a relatively new area of research Three of the papers in this volume deal with Maltese English which is explored from the different perspectives of rhythm the syntax of nominal phrases and lexical choice The last contribution discusses the way in which Maltese Sign Language LSM has evolved alongside developments in LSM research In summary we believe the present volume has the potential to present a unique snapshot of a complex linguistic situation in a geographically restricted area Given the nature and range of topics proposed the volume will likely be of interest to researchers in both theoretical and comparative linguistics as well as those working with experimental and corpus based methodologies Our hope is that the studies presented here will also serve to pave the way for further research on the languages of Malta encouraging researchers to also take new directions including the exploration of variation and sociolinguistic factors which while often raised as explanatory constructs in the papers presented here remain under researched **ELT Revisited** Marcela Malá, Zuzana Šaffková, 2016-08-17 This volume brings together selected papers

presented during the 9th International Conference of the Association of Czech Teachers of English titled Teaching for Tomorrow and hosted by the English Department of the Faculty of Science Humanities and Education at the Technical University of Liberec Czech Republic The conference brought together English Language Teaching ELT professionals from primary secondary and tertiary education to discuss a variety of English as a Foreign Language EFL related topics ranging from reports on language research to viewpoints and insights on classroom practice The contributions are grouped into three sections a Focus on Selected Language Topics b Increasing Learner Autonomy and c Innovative Teaching English as a Foreign Language TEFL ideas Papers were carefully chosen in order to appeal to a broad audience Consequently there are articles which have a mainly theoretical bent and those which have a more practical leaning Although the conference was hosted in the Czech Republic and the majority of participants were from this country the book is relevant to any context where English is taught as a foreign or second language Therefore teachers advanced students of English language researchers and indeed anyone engaged in the EFL profession will find this collection both educational and thought provoking
