**Vulnerability and Adaptation Assessments** Ron Benioff,Sandra Guill,Jeffrey Lee,2012-12-06 The possible impacts of global climate change on different countries has led to the development and ratification of the Framework Convention on Climate Change FCCC and has a strong bearing on the future sustainable development of developing countries and countries with economies in transition The preparation of analytical methodologies and tools for carrying out assessments of vulnerability and adaptation to climate change is therefore of prime importance to these countries Such assessments are needed to both fulfill the reporting requirements of the countries under the FCCC as well as to prepare their own climate change adaptation and mitigation plans The vulnerability and adaptation assessment guidelines prepared by the U S Country Studies Program bring together all the latest knowledge and experience from around the world on both vulnerability analysis as well as adaptation methodologies It is currently being applied successfully by scientists in over fifty countries from all the regions of the globe This guidance is being published to share it with the wider scientific community interested in global climate change issues This guidance document has two primary purposes To assist countries in making decisions about the scope and methods for their vulnerability and adaptation assessments To provide countries with guidance and step by step instructions on each of the basic elements of vulnerability and adaptation assessments

**Assessing Vulnerability to Global Environmental Change** Anthony Patt,Dagmar Schröter,Klein Richard J. T.,Anne Cristina de la Vega-Leinert,Rik Leemans,2012-05-16 Assessing the vulnerability of human populations to global environmental change particularly climate change is now the main imperative of research and international action However much of the research into vulnerability is not designed to feed directly into decision making and policy creating a gap between the knowledge created by researchers and what is required by decision makers This book seeks to rectify this problem and bridge the gap It discusses vulnerability as the central theme and brings together many different applications from disaster studies climate change impact studies and several other fields and provides the most

comprehensive synthesis of definitions theories formalization and applications to date illustrated with examples from different disciplines regions and periods and from local through to regional national and international levels Case study topics cover sea level rise vulnerability to changes in ecosystem services assessing the vulnerability of human health and double exposure to climate change and trade liberalization amongst other issues Research outcomes stress that science policy dialogues must be transparent to be effective and concentrate on a mutual understanding of the concepts used A key research finding is that the most useful information for decision makers is that which shows the separate causes and drivers of vulnerability rather than presenting vulnerability in an aggregated form The book concludes with a unifying framework for analysing integrated methodologies of vulnerability assessment and guiding how research and policy can be linked to reduce vulnerability
