Contracts: Cases and Commentaries Stephanie Ben-Ishai, 2018      **Contracts** John Philip Dawson, William Burnett Harvey, Stanley D. Henderson, Douglas G. Baird, 2013

With the appearance of the Tenth Edition this book enters its sixth decade. Throughout its long history this casebook has relied on classic cases to capture the fundamental principles of contract law and this edition reinforces that tradition. This new edition preserves and builds upon the book's distinctive character especially its use of canonical cases, its sensitivity to the history and evolution of doctrine and its close attention to the legal consequences of breach. The newly added cases show how the basic principles of contract law continue to apply across a wide range of transactions. As before this edition eschews any distinctive take on the law of contracts and thus allows each teacher using the book a broad range of choice on what to bring in to channel or expand classroom discussion. The most visible alteration in this edition is an expanded treatment of the important problem of contract interpretation. A significant amount of new material has been added but the length of the book remains about the same. This edition both covers recent developments and maintains a manageable length.

*Cases and Comment on Contracts* John Philip Dawson, William Burnett Harvey, Stanley D. Henderson, 1982      *Aspiration and Reality in Legal Education* David Sandomierski, 2020-02-24

Contrary to conventional narratives about legal education *Aspiration and Reality in Legal Education* reveals a widespread desire among law teachers to integrate both theory and practice into the education of versatile and civic minded lawyers. Despite this stated desire however this aspiration is largely unrealized due to a host of intellectual and institutional factors that produce a profound gap between what professors believe about law and the ideas they communicate through their teaching. Drawing on interviews with over sixty law professors in Canada David Sandomierski makes two important empirical discoveries in this book. First he establishes that contrary to a dominant narrative in legal education that conceives of theory and practice as oppositional the vast majority of law professors consider theory to be vitally important in preparing better lawyers. Second he uncovers a significant gap between the realist theoretical commitments held by a majority of professors and the formalist theories they almost uniformly convey through their teaching and conceptions of legal reasoning. Understanding the intellectual and institutional factors that account for these tensions Sandomierski argues is essential for any meaningful project of legal education reform.

*Case and Comment*, 1906      **Commentaries on the Law of Contracts** William Frederick Elliott, 1913      *Commentaries on Contracts* American Law Institute, 1926      *Commentaries on European Contract Laws* Nils Jansen, Reinhard Zimmermann, 2018-07-12

The book provides rule by rule commentaries on European contract law general contract law consumer contract law the law of sale and related services dealing with its modern manifestations as well as its historical and comparative foundations. After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades.

and for an assessment of the current situation In particular the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law The present book adopts a broad perspective and an integrative approach All relevant reference texts from the CISG to the Draft Common European Sales Law are critically examined and compared with each other As far as the *acquis commun* ie the traditional private law as laid down in the national codifications is concerned the Principles of European Contract Law have been chosen as a point of departure The rules contained in that document have however been complemented with some chapters sections and individual provisions drawn from other sources primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law In addition the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background and it thus investigates whether and to what extent these texts can be taken to be genuinely European in nature ie to constitute a manifestation of a common core of European contract law Where this is not the case the question is asked whether and for what reasons they should be seen as points of departure for the further development of European contract law
