**Introduction to Computing Using Python**

Ljubomir Perkovic, 2012-04-13

Perkovic's Introduction to Programming Using Python is more than just an introduction to programming. It is an inclusive introduction to Computer Science that takes the pedagogical approach of the right tool for the job at the right moment and focuses on application development. The approach is hands on and problem oriented with practice problems and solutions appearing throughout the text. The text is imperative first but does not shy away from discussing objects early where appropriate. Discussions of user defined classes and Object Oriented Programming appear later in the text when students have more background and concepts can be motivated. Chapters include an introduction to problem solving techniques and classical algorithms, problem solving and programming, and ways to apply
