The Financial Markets of the Arab Gulf Jean Francois Seznec, Samer Mosis, 2018-11-13 Financial markets across the Arabian Peninsula have gone from being small quasi medieval structures in the 1960s to large world class groupings of financial institutions This evolution has been fueled by vast increases in income from oil and natural gas The Financial Markets of the Arab Gulf presents and analyzes the banks stock markets investment companies money changers and sovereign wealth funds that have grown from this oil wealth and how this income has acted as a buffer between Gulf society at large and the newfound cash reserves of Gulf Cooperation Council states Saudi Arabia the United Arab Emirates Qatar Kuwait Oman and Bahrain over the last fifty years By assessing the development of institutions like the Abu Dhabi Investment Authority the Saudi Arabian Monetary Authority the Public Investment Fund and the National Bank of Kuwait The Financial Markets of the Arab Gulf evaluates the growth of the markets and provides a detailed critical snapshot of the current form and function of the Gulf s financial markets It argues that the markets have been controlled by various state institutions for socio political reasons In particular the Saudi state has used its sophisticated regulatory regime to push for industrialization and diversification which culminated in the Vision 2030 plan The UAE Qatar Kuwait Bahrain and Oman have also been strongly involved in establishing modern markets for similar purposes but have done so through different means with varying results and each in line with what has been considered their respective comparative advantages Along with critically surveying these institutions and their role in global finance the book also presents case studies depicting transactions typical to the region including the highly profitable documentary credits of commercial banks the financial scandal of certain financiers and their regulatory arbitrage between Bahrain and Saudi Arabia a review of the Dubai s trade miracle and an assessment of the value and importance of the privatization of Saudi Aramco

nanced and comprehensive examination of how innovative financing technologies and entrepreneurial innovations promote sustainable enterprises in these regions Contributions from experts academics and practitioners across Africa Asia Eastern Europe and South America offer diverse perspectives Given the pivotal role of enterprises in fostering economic growth and the significant influence of emerging and developing economies on global GDP entrepreneurship and business investment it is critically imperative to explore this phenomenon for business sustainability and the attainment of sustainable development goals SDGs for a more sustainable future Consequently it is plausible to argue that deepening awareness of the intricate relationship between innovative financing technologies the business environment and entrepreneurial innovations to promote sustainable enterprises in developing and emerging economies would not only enhance understanding but also stimulate debate and provoke a reassessment of appropriate financing models and tools for supporting enterprise growth and sustainability in these regions While many finance and enterprise books tend to narrow their focus on developed economies this book stands out for its wide ranging and broad scope It endeavors to explore issues from the perspectives of developing and emerging economies offering readers a deeper and broader understanding of the challenges and opportunities at hand
