This Technical Assistance Report discusses the technical advice and recommendations given by the IMF mission to the authorities of Uganda about the concepts and methods used to compile the consumer price index CPI The conceptual basis of the rebased CPI was extensively discussed during the IMF mission The rebasing was considered to be an opportunity to change the conceptual basis of the CPI and to compile weights using the domestic concept The Uganda National Household Survey UNHS data were compared with household consumption derived in the supply and use tables Tobacco and beer for instance are significantly underreported in the UNHS Adjustment of the weight for under or overreporting by comparing the UNHS data to other sources is recommended **Directives, Publications and Reports Index** United States. Guard, 1959 *Perspectives In U.s. Marxist Anthropology* David J. Hakken, Hanna Lessinger, June Nash, Florence Babb, 2019-06-04 An assessment of current trends in Marxist anthropology this collection of essays reflects both the unifying force of Marxist thought and the diversity of contemporary anthropology Linked by a common approach a shared commitment to Marxist analysis the contributors look at a variety of phenomena including the problems of labor and work in terms of a coherent theory of Marxism Examining political economic and ethnic situations the authors discuss social structures ideology and class formation This unique volume warrants the attention of both Marxists and non Marxists in anthropology and of scholars in other fields *Clinical Education in Physical Therapy: The Evolution from Student to Clinical Instructor and Beyond* Debra F Stern, Rebecca Rosenthal, 2019-04-18 Written in adherence with the Commission on Accreditation in Physical

Therapy Education's CAPTE standards *Clinical Education in Physical Therapy* explores the evolution from student to Clinical Instructor while serving as an essential educational resource for entry level Physical Therapy students This exciting new resource presents an overview on the rewards and challenges of becoming a Clinical Instructor the legal issues involved for the academic institution and the clinical sites clinical education models student characteristics establishing a clinical education program and much more *Clinical Education in Physical Therapy* includes a dedicated chapter on leadership and professionalism both of which have been stressed in recent years by both the APTA and CAPTE Key Points at the beginning of each chapter establish the primary take aways for readers while case studies in select chapters reinforce practical application of the material **School Reform, Corporate Style** Dorothy Shipps, 2006 Like other big city school systems Chicago's has been repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipps

reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipp's chronicles how Chicago's corporate actors led abetted or restrained nearly every attempt to transform the city's school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago's reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880-1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipp's concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipp's makes a strong case that it's high time to look elsewhere perhaps to educators themselves for new leadership
