Concurrent Engineering C.S. Syan, U. Menon, 2012-12-06 BACKGROUND There is an increasing awareness that time to market is the key competitive issue in the manufacturing industry today The global markets are demanding products that are well designed are of high quality and are at low prices with ever decreasing lead times Hence manufacturers are forced to utilize the best methods of technology with efficient control and management accompanied by suitably enabling organizational structures Concurrent engineering CE is widely seen to be the methodology that can help satisfy these strenuous demands and keep the profitability and viability of product developers manufacturers and suppliers high There have been many reported successes of CE in practice Rover were able to launch Land Rover Discovery in 18 months as compared with 48 63 months for similar products in Europe Because of its early introduction to the market it became the best selling product in its class AT T report part counts down to one ninth of their previous levels and quality one hundred times in surface defects for VLSI very improvements of large scale integration circuits as a result of using the CE approach WHO SHOULD READ THIS TEXT This book will aim to provide a sound basis for the very diverse subject known as concurrent engineering Concurrent engineering is recognized by an increasingly large proportion of the manufacturing industry as a necessity in order to compete in today s markets This recognition has created the demand for information awareness and training in good concurrent engineering practice

Improving Complex Systems Today Daniel D. Frey, Shuichi Fukuda, Georg Rock, 2011-07-09 As the main theme of Improving Complex Systems Today implies this book is intended to provide readers with a new perspective on concurrent engineering from the standpoint of systems engineering It can serve as a versatile tool to help readers to navigate the ever changing state of this particular field The primary focus of concurrent engineering was at first on bringing downstream information as far upstream as possible by introducing parallel processing in order to reduce time to market and to prevent errors at a later stage which would sometimes cause irrevocable

damage Up to now numerous new concepts methodologies and tools have been developed but over concurrent engineering s 20 year history the situation has changed extensively Now industry has to work in the global marketplace and to cope with diversifying requirements and increasing complexities Such globalization and diversification necessitate collaboration across different fields and across national boundaries Thus the new concurrent engineering calls for a systems approach to gain global market competitiveness Improving Complex Systems Today provides a new insight into concurrent engineering today

Concurrent Engineering Peihua Gu, Andrew Kusiak, 1993 Hardbound Increasing global competition in a product oriented industry has required manufacturing enterprises to continuously improve product quality functionality and features as well as implementing a reduction in product cost and time to market The traditional approach to product development requires a substantial amount of time to evolve the product design from its initial configuration to the final product Since 70% or more of the total product cost is determined in the design stages significant potential savings can be achieved by improving traditional design practices Because of its effectiveness and great potential in product design concurrent engineering CE is attracting great interest from both industry and academia The thirteen research papers in this volume provide a current overview on progress in concurrent engineering Divided into two parts Part I primarily focuses on methodology and applications of CE while Part II dis

Hierarchical Concurrent Engineering: Supporting Hierarchical Decomposition and Peer-to-peer Problem Solving University of Michigan. Dept. of Electrical Engineering and Computer Science. Computer Science and Engineering Division, Joseph G. D'Ambrosio, William P. Birmingham, 1995 Abstract One primary task of engineering design is resolution of the conflicting objectives that are inherent in the design process This problem is even more difficult when members of a design team who each have different perspectives must resolve these conflicts We present a decision theoretic approach for resolving conflicting objectives during the design process and discuss an extension to this approach that addresses coordination of hierarchical design organizations Hierarchical design organizations arise from traditional hierarchical system decomposition subcontracting and supervisor subordinate relationships We believe the methods presented in this paper are general and thus will provide benefits not only to concurrent engineering but other domains as well

Moving Integrated Product Development to Service Clouds in the Global Economy J. Stjepandić, 2014-09-23 The theory of concurrent engineering is based on the concept that the different phases of a product lifecycle should be conducted concurrently and initiated as early as possible within the product creation process Concurrent engineering is important in many industries including automotive aerospace shipbuilding consumer goods and environmental engineering as well as in the development of new services and service support This book presents the proceedings of the 21st ISPE Inc International Conference on Concurrent Engineering held at Beijing Jiaotong University China in September 2014 It is the first volume of a new book series Advances in Transdisciplinary Engineering The title of the CE2014 conference is Moving Integrated Product Development to Service Clouds in the Global Economy which reflects the variety of processes and methods which influence modern product creation After an initial first section presenting the keynote papers the remainder of the book is divided into 11 further sections with peer reviewed papers
