Evolutionary Theory and Processes: Modern Perspectives Solomon P. Wasser, 2012-12-06 This volume consists of papers written by evolutionary molecular and organismal biologists geneticists ecologists behavioural ecologists morphologists mathematicians theoreticians and experimentalists in honour of Professor Eviatar Eibi Nevo on the occasion of his seventieth birthday The contributors are only a small subset of Eibi's many friends collaborators and students not that one can distinguish these categories among Eibi's colleagues His widespread influence and activity both in Israel and more generally as a leading evolutionary biologist is indicated by his many co authors on books and papers and by his many students integrated in teaching and research This volume presents some of the most recent dramatic results of molecular genomic and organismal evolutionary processes It represents analyses experiments observations reviews discussions and forecasts of evolutionary theory comprising both novel methods and results reanalyzed and reviewed data sets based on comparative experimental and theoretical studies utilizing model organisms across phylogeny including bacteria fungi plants animals and humans It elucidates the revolution in molecular biology that ushered in our understanding of the evolutionary process over time and space The topics discussed include major problems of evolutionary theory concerning origins phylogeny relative importance of evolutionary forces structure and function adaptation and speciation in space and time in changing and stressful environments A major emerging generalization is the nonrandomness of genome structure highlighting the importance of natural selection as a major organizing evolutionary force not only at the phenotypic level but most importantly at the interlinked genotypic molecular level The integration between the molecular and organismal levels unifies life which is subjected to the mechanism of natural selection as a major orienting evolutionary force

The Tangled Bank Stanley Edgar Hyman, 1966

The Prism and the Rainbow Joel W. Martin, 2010-06-01 God or Darwin It is one of the most contentious conflicts of our time It is also completely unnecessary according to Joel W Martin an evolutionary biologist and ordained elder in the Presbyterian Church USA In this slim but powerful book Martin argues that it is not contradictory to be a practicing faithful Christian who accepts the science of

evolution Martin finds that much of the controversy in the United States over evolution is manufactured and predicated on a complete and sometimes willful misapprehension of basic science Science and religion he says serve different purposes and each seeks to answer questions that the other need never address He believes that many of the polarizing debates about evolution distract from the deeper lessons of Christianity and that literal fundamentalist readings of the Bible require the faithful to reject not just evolution but many of science s greatest discoveries Just as the scientific explanation of rainbows is not meant to refute the biblical rainbow story of God s promise evolutionary theory is not a ploy to disavow the divine Indeed Martin shows that the majority of Christians worldwide accept the theory of evolution He urges his fellow Christians to refuse to participate in the intellectually stifling debate over evolution and creationism intelligent design *Evolution and Man* Hervey Woodburn Shimer,1929 **National Geographic** ,2010-03 **The Open Laboratory** ,2009 This year s editor Jennifer Rohn put together a collection of fifty two selected blog posts showcasing the quality and diversity of science writing on blogs in 2008 You can see the background story on how the book came about here You can order the first 2006 volume here and the second 2007 here *Time* Briton Hadden, Henry R. Luce,2009 *The Descent of Love* Bert Bender,2015-11-16 Upon its publication in 1871 Charles Darwin s *The Descent of Man and Selection in Relation to Sex* sent shock waves through the scientific community and the public at large In an original and persuasive study Bert Bender demonstrates that it is this treatise on sexual selection rather than any of Darwin s earlier works on evolution that provoked the most immediate and vigorous response from American fiction writers These authors embraced and incorporated Darwin s theories insights and language creating an increasingly dark and violent view of sexual love in American realist literature In *The Descent of Love* Bender carefully rereads the works of William Dean Howells Henry James Elizabeth Stuart Phelps Sarah Orne Jewett Kate Chopin Harold Frederic Charles W Chesnutt Edith Wharton and Ernest Hemingway teasing from them a startling but utterly convincing preoccupation with questions of sexual selection Competing for readership as novelists who best grasped the real nature of human love these writers also participated in a heated social debate over racial and sexual differences and the nature of sex itself Influenced more by *The Descent of Man* than by the *Origin of Species* Bender s novelists built upon Darwin s anthropological and zoological materials to anatomize their character s courtship behavior returning consistently to concerns with physical beauty natural dominance and the power to select a mate Bringing the resources of the history of science and intellectual history to this the first full length study of the impact of Darwin s theories in American literature Bender revises accepted views of social Darwinism American literary realism and modernism in American literature forever changing our perceptions of courtship and sexual interaction in American fiction from 1871 to 1926 and beyond **Biology of the Reptilia** Carl Gans,1969 **The Writers Directory** ,2013
