Conceptual and Historical Issues in Psychology Brad Piekola, 2016-12-07 This book covers key movements that helped to shape psychology from the early philosophical debate between rationalism and empiricism or realists and antirealists through to the emergence of psychology as a science and the ongoing debates about objectivity and truth and what a science of psychology should be Often nuanced and complex the author examines major conceptual issues in the history of psychology that continue to be debated and influence public policy and lay understanding The latter stages of the book explore notions of individuality hereditarianism critical psychology and feminist perspectives While deeply rooted in human history it is made clear that psychology how it is conceived and practiced has a bearing on our understanding of what it is to be human Accessible objective and above all comprehensive this book will help students locate psychology in the wider field of science and understand the forces that continue to shape and define it

The Big Five in SLA Ewa Piechurska-Kuciel, 2020-11-03 This book also focuses on analyzing each trait from the point of view of its higher and lower order structure as well as from the affective cognitive behavioral social and academic perspectives apart from outlining the field of personality psychology Personality traits are important in daily interaction and are a significant factor in achieving educational goals also for second and foreign language L2 learners Consequently studying the role of personality in the field of second language acquisition SLA appears to be of primary importance

especially because there has been little research on this subject Moreover general results pertaining to the role of personality in L2 are inconclusive This book s primary objective is to present a concise and updated picture of personality on the basis of the Big Five model which is accessible for non psychologists The middle part of the book focuses on discussing potential merits and drawbacks of each trait for the purpose of the process of SLA both from the formal and informal theoretical and empirical points of view The next part includes a description of an empirical study whose main aim is to sensitize the reader to direct and indirect influences that personality may exert on L2 learning The book closes with a concluding chapter aiming at clarifying directions for further empirical study of personality as well as issues in research methodology
