Objective: As psychologists continue to expand our understanding and appreciation for how multiple aspects of identity are associated with pediatric health, it is critical to examine the intersections of these various identities. Pediatric psychologists are experts in collaborating with interdisciplinary colleagues (including chaplains, clergy, and spiritual counselors) to support patients and families as they cope with adversity and find meaning in pediatric illness. Similarly, pediatric psychologists are advocates for inclusion, which may entail cultural adaptation of evidence-based protocols, facilitating understanding within medical teams, and navigating relationships with community supports. The last few years have also highlighted the importance of balance, wellness, self-care, and coping for health care providers, including pediatric psychologists. **Method:** This special issue sought regular empirical articles, topical and systematic reviews, commentaries, case studies, and provider perspectives showcasing clinical practice innovations and novel research on the intersecting roles of religion, faith, and spirituality in pediatric psychology. **Results:** The special issue includes 11 articles, encompassing topical reviews, qualitative and quantitative research, a commentary, and a bioethics-based case series. Many articles include actionable recommendations for addressing religion, faith, and spirituality in pediatric psychology. **Conclusion:** This collection of articles highlights important ways in which religion, faith, and spirituality have been integrated into pediatric psychology practice and research, and illuminates multiple future pathways for increased integration of this important aspect of identity.

Implications for Impact Statement

This special issue aims to highlight the role of religion, faith, and spirituality in clinical care, research, and advocacy within the field of pediatric psychology. Increased integration of these factors is key to enhancing our understanding and appreciation of diversity, equity, and inclusion.

The Spiritual Path H. F. de Wit, 1999 The Spiritual Path focuses on themes important for those dealing with fundamental life questions in their own lives or in their professions as spiritual caregivers psychologists or psychotherapists Using an interreligious approach Han de Wit offers psychological insights from the world's spiritual traditions to show how spiritual practices serve to cultivate our fundamental humanity De Wit asks essential questions concerning that fundamental humanity Why is it that some people experience and radiate an increasing measure of joy in their lives while others become increasingly anxious and fearful And why do some people become wiser and more compassionate as a result of their experience of suffering while others break down under that same suffering How can these two such differing psychological manifestations occur under similar circumstances And can individuals influence these psychological outcomes or does this lie beyond human control The Spiritual Path describes an inner flourishing an awakening in the human person that is specifically spiritual and the life's journey that is taken in light of such an awakening By taking such a journey de Wit argues

and living this contemplative life a way of life for all times and all cultures individuals can foster their own inner flourishing that may result in greater clarity of mind and joy in life In this way The Spiritual Path is both theoretical and practical By acknowledging and utilizing the psychological insights found in spirituality we are able to seek and find the spiritual path even as we live in the everyday world

Psychology, Religion, and Spirituality James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental understandings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult
