**The View From Nowhere** Thomas Nagel, 1986-01-23 Human beings have the unique ability to view the world in a detached way We can think about the world in terms that transcend our own experience or interest and consider the world from a vantage point that is in Nagel's words nowhere in particular At the same time each of us is a particular person in a particular place each with his own personal view of the world a view that we can recognize as just one aspect of the whole How do we reconcile these two standpoints intellectually morally and practically To what extent are they irreconcilable and to what extent can they be integrated Thomas Nagel's ambitious and lively book tackles this fundamental issue arguing that our divided nature is the root of a whole range of philosophical problems touching as it does every aspect of human life He deals with its manifestations in such fields of philosophy as the mind body problem personal identity knowledge and skepticism thought and reality free will ethics the relation between moral and other values the meaning of life and death Excessive objectification has been a malady of recent analytic philosophy claims Nagel it has led to implausible forms of reductionism in the philosophy of mind and elsewhere The solution is not to inhibit the objectifying impulse but to insist that it learn to live alongside the internal perspectives that cannot be either discarded or objectified Reconciliation between the two standpoints in the end is not always possible

**The Mind As a Scientific Object** Christina E. Erneling, David M. Johnson, 2005-01-13 What holds together the various fields that are supposed to constitute the general intellectual discipline that people now call cognitive science In this book Erneling and Johnson identify two problems with defining this discipline First some theorists identify the common subject matter as the mind but scientists and philosophers have not been able to agree on any single satisfactory answer to the question of what the mind is Second those who speculate about the general characteristics that belong to cognitive science tend to assume that all the particular fields falling under the rubric psychology linguistics biology and son on are of roughly equal value in their ability to shed light on the nature of mind This book argues that all the cognitive science disciplines are not equally able to provide answers to ontological questions about

the mind but rather that only neurophysiology and cultural psychology are suited to answer these questions However since the cultural account of mind has long been ignored in favor of the neurophysiological account Erneling and Johnson bring together contributions that focus especially on different versions of the cultural account of the mind *In Sensible Judgement* Max Deutscher,2016-05-23 Taking its bearings from classic texts including Plato Kant Hegel and Arendt this thoughtful and intriguing book provides philosophical reflection on what it is to judge and what judgement achieves alongside and sometimes in competition with thinking and willing Opening with the landmark Mabo High Court case in Australia and with detailed reference to other significant debates of judgement of the twentieth century Max Deutscher seeks to explore and explain approaches to the concepts of what is good right and legal Describing a connection between reason and grounds intrinsic to judgement he analyses and explores the tendency towards absolutism that displaces proper judgement By weaving concrete instances of judgement with philosophical thought Deutscher provides a fascinating phenomenology of practices of judgement that should appeal to all readers with an interest in legal philosophical and political thought **The Broadview Introduction to Philosophy** Andrew Bailey,2019-05-21 The Broadview Introduction to Philosophy is a comprehensive anthology that surveys core topics in Western philosophy including philosophy of religion theories of knowledge metaphysics ethics social political philosophy and issues of life death and happiness Unlike other introductory anthologies the Broadview offers considerable apparatus to assist the student reader in understanding the texts without simply summarizing them Each selection includes an introduction discussing the context and structure of the primary reading as well as thorough annotations designed to clarify unfamiliar terms references and argument forms Canonical texts from the history of philosophy are presented alongside contemporary scholarship women authors are included throughout The Broadview Introduction to Philosophy: Concise Edition Andrew Bailey,2024-01-18 The concise edition of The Broadview Introduction to Philosophy offers 44 historical and contemporary readings on core topics in Western philosophy including philosophy of religion theories of knowledge metaphysics ethics social political philosophy and issues of life death and happiness Unlike other introductory anthologies the Broadview offers considerable apparatus to assist the student reader in understanding the texts without simply summarizing them Each selection includes an introduction discussing the context and structure of the primary reading as well as thorough annotations designed to clarify unfamiliar terms references and argument forms Canonical texts from the history of philosophy are presented alongside contemporary scholarship women authors are included throughout Cooperation in Value-Creating Networks Josef Wieland,Stefan Linder,Jessica Geraldo Schwengber,Adrian Zicari,2024-02-28 This volume embarks on a research journey that focuses on the processes of economic and social value creation in the 21st century Given that value creation is increasingly organized in networks consisting of businesses governments academia civil society and other societal stakeholders the contributions address various aspects of and challenges in governing cooperation in value creating networks Exploring topics such as
