Landscape as Urbanism Charles Waldheim, 2016-02-16 A definitive intellectual history of landscape urbanism It has become conventional to think of urbanism and landscape as opposing one another or to think of landscape as merely providing temporary relief from urban life as shaped by buildings and infrastructure But driven in part by environmental concerns landscape has recently emerged as a model and medium for the city with some theorists arguing that landscape architects are the urbanists of our age In Landscape as Urbanism one of the field's pioneers presents a powerful case for rethinking the city through landscape Charles Waldheim traces the roots of landscape as a form of urbanism from its origins in the Renaissance through the twentieth century Growing out of progressive architectural culture and populist environmentalism the concept was further informed by the nineteenth century invention of landscape architecture as a new art charged with reconciling the design of the industrial city with its ecological and social conditions In the late twentieth and early twenty first centuries as urban planning shifted from design to social science and as urban design committed to neotraditional models of town planning landscape urbanism emerged to fill a void at the heart of the contemporary urban project Generously illustrated Landscape as Urbanism examines works from around the world by designers ranging from Ludwig Hilberseimer Andrea Branzi and Frank Lloyd Wright to James Corner Adriaan Geuze and Michael Van Valkenburgh The result is the definitive account of an emerging field that is likely to influence the design of cities for decades to come
