Biocentrism Robert Lanza, Bob Berman, 2010-05-18 Robert Lanza is one of the most respected scientists in the world a US News it suggests the exhilarating possibility that life is fundamentally immortal The 21st century is predicted to be the Century of Biology a shift from the previous century dominated by physics It seems fitting then to begin the century by turning the universe outside in and unifying the foundations of science with a simple idea discovered by one of the leading life scientists of our age Biocentrism awakens in readers a new sense of possibility and is full of so many shocking new perspectives that the reader will never see reality the same way again

Is Biocentrism Dead? Raj Bogle, 2014-05-16 Is Biocentrism Dead It is a topic that many find a bit off putting but it is a question that many individuals are starting to pose as they become wiser The book explains what biocentrism is and how the tenets that surround this concept came into being This is a book that the inquiring mind will appreciate thus it is ideal for the individuals who want to learn more about themselves and the world around them The author gradually disseminates the information to the reader allowing them to fully understand what biocentrism really means

Beyond Biocentrism Robert Lanza, Bob Berman, 2016-05-03 Biocentrism shocked the world with a radical rethinking of the nature of reality But that was just the beginning In *Beyond Biocentrism* acclaimed biologist Robert Lanza one of TIME Magazine's 100 Most Influential People in 2014 and leading astronomer Bob Berman take the reader on an intellectual thrill ride as they re-examine everything we thought we knew about life death the universe and the nature of reality itself The first step is acknowledging that our existing model of reality is looking increasingly creaky in the face of recent scientific discoveries Science tells us with some precision that the universe is 26.8 percent dark matter 68.3 percent dark energy and only 4.9 percent ordinary matter but must confess that it doesn't really know what dark matter is and knows even less about dark energy Science is increasingly pointing toward an infinite universe but has no ability to explain what that really means Concepts such as time space and even causality are increasingly being demonstrated as meaningless All of science is based on information passing through our consciousness but science hasn't the foggiest idea what consciousness is and it can't explain the linkage between subatomic states and observation by conscious observers Science describes life as a random occurrence in a dead universe but has no real understanding of how life began or why the universe appears to be exquisitely designed for the emergence of life The biocentrism theory isn't a rejection of science Quite the opposite Biocentrism challenges us to fully accept the implications of the latest scientific findings in fields ranging from plant biology and cosmology to quantum entanglement and consciousness By listening to what the science is telling us it becomes increasingly clear that life and consciousness are fundamental to any true understanding of the universe This forces a fundamental rethinking of everything we thought we knew about life death and our place in the universe
