★ Describe what is happening in figures 1-3. Is the population of mice different in figure 3 than in figure 1? Explain why.

Living things that are well adapted to their environment survive and reproduce. Those that are not well adapted don't survive and reproduce. An **adaptation** is any characteristic that increases **fitness**, which is defined as the ability to survive and reproduce.

★ What characteristic of the mice in figure 1 was an adaptation that increased fitness?

The table describes four female mice that live in a beach area which is mostly tan sand with scattered plants.

Characteristics of each female mouse	Color of Fur			
	Black	Tan	Tan and Black	Cream
Running speed	8 cm/sec.	6 cm/sec.	7 cm/sec.	5 cm/sec.
# pups produced by each female	0	11	3	0
Age at death	2 months	8 months	4 months	2 months

★ According to the definition given for fitness, which mouse would biologists consider the fittest? Explain why this mouse would be the fittest.

★ If a mouse's fur color is generally similar to its mother's color, what color fur would be the most common among the pups?
