George,2025-07-25 Aristotle famously maintains in his treatise On the Soul that there are three kinds of living things plants animals and humans and he speaks of each kind as having a soul St Thomas Aquinas adopts these same views Nowadays however many thinkers reject them on the grounds that they are incompatible with modern science Molecular biology is seen as affording a superior way of categorizing life forms Evolutionary biology appears to have established that humans are simply primates with adaptations somewhat different from other primates Plant physiology uncovering plants directional responses to a wide variety of different stimuli provides reason to think that plants sense light pressure odor pathogens etc in which case plants are simply non mobile animals similar to coral Neuroscience by showing the dependency of thought choice perception and emotion on the central nervous system especially on the brain seems to

have eliminated any need to posit a soul Plants Animals People Aliens addresses these and a variety of other science based claims about living things by bringing Aristotelian Thomistic teachings to bear upon them While not a systematic work it both treats some of the most hotly debated philosophical questions concerning living things such as what it means to be alive as well as treating questions less often raised by philosophers such as whether animals have a theory of mind Though geared primarily to those conversant with the Aristotelian Thomistic tradition many of its key concepts are traced back to experiences that we all share in common thus rendering these concepts intelligible if not convincing to those with scientific and other backgrounds who are curious about this philosophical approach to living things The author strives to show how Aristotelian Thomistic philosophy and science complement one another by sketching out the fuller understanding of the living realm that the two together provide The book s final section considers the possibility and the likelihood that embodied rational beings exist elsewhere in our universe Here theological arguments drawn from the Christian faith are presented alongside philosophical and scientific arguments This section closes with a theological discussion of the disputed question of whether extraterrestrials were they to exist should be baptized

and references from the book on a variety of devices      *GOD SAW YOU* Robert E. Carpenter D.D.S,2025-08-11 In God Saw You Dr Carpenter takes the reader through a fascinating journey that focuses on the modern sciences of genetics and biochemistry uniting them with the mysteries of the kingdom of God Over 1 400 footnotes are presented on the page referring to them so the reader has immediate access to the truths presented Modern science and the Holy Scriptures conflict with each other On these pages the battle lines are reduced unapologetically from assumptions possibilities hypotheses and theories to raw truths many of which you might find to be inconvenient The author finds an amazing number of scriptures that deal with genetics ranging from simple concepts such as seeds and conception to complex references to DNA and the human genome The book s real pay dirt is when he reveals the beautiful spiritual truths that are metaphorically parallel to these physical sciences This is the true sense of the word apocalypse meaning an unveiling The entire Bible is an apocalypse an unveiling of who God is His kingdom His expectations and all of history past present and future This book does just that lifting the veil off of familiar scriptures and revealing the rich and thrilling images previously hidden in the mysteries of God s Word Get ready to see into the mind of God as He planned and programmed your genome As King David said in Psalm 139 Your eyes saw my substance being yet unformed and in Your book they all were written when as yet there were none of them How precious also are Your thoughts to me O God How great is the sum of them Yes God actually Saw You And when you see that you will never be the same again      *Foundations of Biology* Lorande Loss Woodruff,1927
