

ESSENTIALS OF INSURANCE CONTRACT

3.0 INTRODUCTION

The fundamental principle of Insurance is mathematical; its application is financial; and its interpretation is legal. For the layman to understand the Insurance principle he should be an actuary (who design and price the insurance products); to understand its application to financial problems, he need not be a financial; and to understand its legal concepts, he need not be a lawyer. The subject of Insurance covers a vast array of topics. This and the following chapters are concerned with these topics.

Insurance may be defined as a contract between two parties whereby one party called insurer undertakes in exchange for a fixed sum called premium to pay the other party called insured a fixed amount of money after happening of a certain event.

Insurance policy is a legal contract & its formation is subject to the fulfilment of the requisites of a contract defined under Indian Contract Act 1872.

According to the Act **"A Contract may be defined as an agreement between two or more parties to do or to abstain from doing an act, with an intention to create a legally binding relationship."**

Since Insurance is a contract, certain sections of Indian Contract Act are applicable.
