always placed on the outcome rather than on the ways towards it This publication explores methods and associated tools in the perspective of the information systems life cycle It discusses the need for method flexibility within a design base of certain strict standards and with respect given to the potential harmonization of existing methods The contribution of a broad range of specialists ensures that papers extend across the various facets of the discipline Object Oriented Software Technologies in Telecommunications Iakovos Venieris, Fabrizio Zizza, Thomas Magedanz, 2000-06-15 Object oriented OO technology is an integral part of computer communications and multimedia service provisioning It plays an important role in providing solutions to problems in the development of telecommunication technology This guide seeks to enable telecommunication engineers to understand the basic principles of OO technology It covers both theoretical and practical aspects of OO Technology which could provide solutions to the problems in future development of telecommunications
