*Advertising and Media Research* Justice Hamilton,2018-11-16 Advertising research is a systematic process of marketing research conducted to improve the efficiency of advertising Advertising and media research explains the complexities of planning in a fast moving non complex style As we enter the new century of transformed advertising techniques and marketing challenges Research is to find out something new and advertising research is to find out how advertising works effectively and guide in making effective advertising decisions There are various kinds of advertising research and these include pre testing post testing campaign research and measuring advertising effectiveness Advertising follows logically after listening to consumer requirements introducing productive conditions distributing the goods However the actual sequence and emphasis deriving from the diverse sub cultures can be quite differentiated The effects of the different mass media on social psychological and physical aspects Research survey that segments the people based on what television programs they watch radio they listen and magazines they read Media research makes use of scientific methods of research It aims at providing an objective unbiased evaluation of data First the research problem is identified and then a prescribed set of

procedures of research is followed to investigate the problem Only thereafter comes report of the findings This book is more catered to readers who have no background on the media It is more informational than instructional It s great if you are looking into learning about how the media works per se but not if you are concerned about effectively positioning your products in the market
