A Guide to Business Studies Paras Mahabaly,2008 **The Mathematics Education for the Future Project - Proceedings of the 14th International Conference** Alan Rogerson,Janina Morska,2017-07-01 This volume contains the papers presented at the International Conference on Challenges in Mathematics Education for the Next Decade held from September 10 15 2017 in Balatonf red Hungary The Conference was organized by The Mathematics Education for the Future Project an international edu cational project founded in 1986 The Global Testing Culture William C. Smith,2016-01-04 The past thirty years have seen a rapid expansion of testing exposing students worldwide to tests that are now more than ever standardized and linked to high stakes outcomes The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide The embedded nature and normative power of high stakes standardized testing across national contexts can be understood as a global testing culture The global testing culture permeates all aspects of education from financing to parental involvement to teacher and student beliefs and practices The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability which becomes synonymous with education quality Underlying the global testing culture is a set of values identified from the increasing literature on world culture These include education as a human right academic intelligence faith in science decentralization and neoliberalism Each of these values highlights different aspects of the dialogue in support of high stakes standardized testing The wide approval of these values and their ability to legitimate various aspects of high stakes testing reinforces the taken for granted notion that such tests are effective and appropriate education practices However a large body of literature emphasizes the negative unintended consequences teaching to the test reshaping the testing pool the inequitable distribution of school resources and teachers attention and reconstructing the role of the student teacher and parent commonly found when standardized census based tests are combined with high stakes outcomes for educators or students This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts The volume makes it clear that testing per se is not the problem Instead it is how tests are administered used or misused and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended undesirable consequences *Business Studies* , Self-directed entrepreneurial learning Adri du Toit ,Sukie van Zyl ,Aubrey Golightly ,2026-02-26 The rapid pace of global change challenges education at all levels to prepare 21st century learners for a volatile uncertain complex and ambiguous VUCA world Self directed entrepreneurial learning examines how self directed learning SDL and entrepreneurial learning EL can be integrated across various educational contexts to support lifelong learning teacher preparation and student adaptability Beginning with problem based entrepreneurial learning PBEL this scholarly book explores strategies for fostering self directed entrepreneurial learning

SDEL The authors present empirical studies that illustrate SDL and EL integration across subjects such as Technology Computer Applications Technology Economic and Management Sciences Coding and Robotics Life Orientation Life Skills and the arts Furthermore the authors investigate approaches such as cooperative learning productive failure and arts based project based learning that offer practical ways to develop these competencies in pre service and in service teachers While the studies have been conducted in South Africa the insights and frameworks brought forward are broadly applicable across the African continent and the Global South This scholarly volume offers actionable strategies for academics to design implement and evaluate SDEL promoting autonomy entrepreneurial thinking and socially impactful learning in a rapidly changing world

Ecotheology Levente Hufnagel,2023-01-11 Ecotheology Sustainability and Religions of the World gives a very interesting overview of the frontiers of scientific research in this important multi and transdisciplinary area Its chapters use ecotheological approaches to discuss the multiple aspects of an environmental crisis from almost every segment of our planet This book will be very useful for everyone researchers teachers students or others interested in the field who would like to gain some insights into this aspect of our culture
